- Delivered with source Adobe .PSD files
- Compatibility with Joomla 2.5, Joomla 3.x
- Cross Browser Support: IE8+, Firefox 4+, Safari 4+, Chrome 8+, Opera 9+

Compressed File Contents

The BT Magazine Template zipped in file has contents such as following:

- Extensions (components, modules and plug-ins)
- Documentation
- License
- Photoshop files
- Quickstart package
- Screenshots
- All the files are contained in a zip archived. You need to extract them by using Winrar, Stuffit or your archiving tools

Accompanying Extensions

This template comes with 03 powerful extensions:

- BT Content Showcase module
- BT Social Login module
- BT Google Map

Note: You can only download version of extensions packed with template. To download upgraded version of extension please make sure that your membership account is J!Extensions or J!Developers; or you have already bought this extension as single product.

Help and Support

We support

Support service is part of your purchase. So feel free to ask about Bowthemes product. We engage to support following issues:

1. Issues in the products
2. Usage of our products
3. Non-documented issues, tips and tricks regarding our software.
4. Minor changes to our products in order to work on the site.
5. If you purchase single product, we do provide support only for ONE of your domain name. You can install Bowthemes template in multiple sites, but support is for one domain only.

We don't support

However, there are some issues are unsupported by us:

1. Huge customizations.
2. Massively hacking the core files.
3. Third party extension's conflict issues.

If you need customizations, please email us for a quote at support@bowthemes.com.

Support channel

Our support is done via [email system](#), [ticket system](#) for premium subscribers and [forum support](#) for both premium and non-premium subscribers. At the moment, we do not provide any support via telephone or live chat.

We recommend

*Follow us on Facebook, Twitter, Google+, LinkedIn

*Remind us about latency of support via [Facebook messenger](#)

*Encourage us by voting and leave reviews on [Joomla Extension Directory](#)

Installing

Installing Template file or Quickstart package is your very first decision. If your website already has content and you just want to change its skin, we suggest you to install template file and decide which extensions you would like to add. If you are Joomla novice and your website has no or few data, in most cases, installing Quickstart package is the best choice.

1. Installing Quickstart package

* How a quickstart package works?

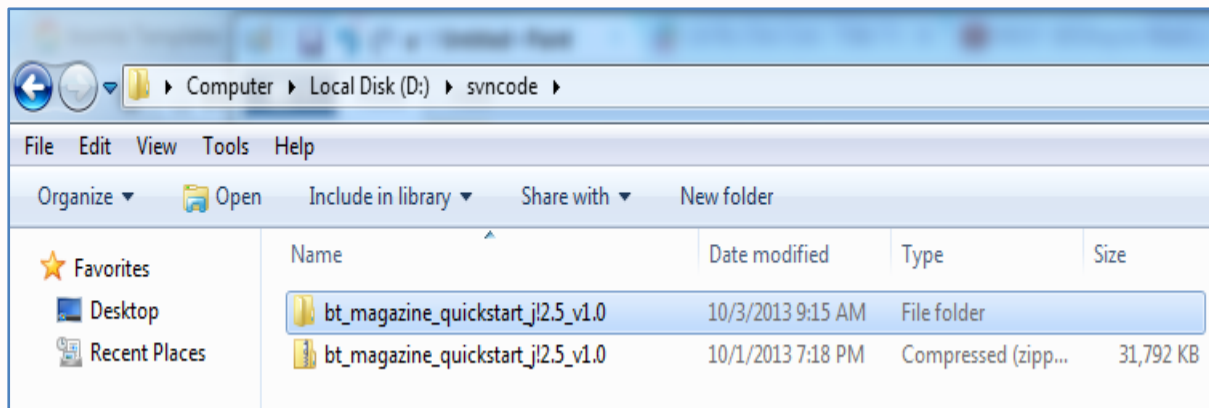

A quickstart package is a total Joomla website installation kit that installs the template and all of the components and plug-ins onto your server at once. Bowthemes provides Quickstart package for each template which aims to easy to use and comfortable for users. It will help you save much time of installing and configuring if you plan to start your site from the beginning. Installing Quickstart package is quite easy as you install normal Joomla!

In short, Quickstart = Joomla! + Template + Modules or/and Plugins + Images* + demo content included

Step 1: Download Bow Themes template package:

Download quickstart package from bowthemes.com. Please make sure you download correct package for the Joomla version you want to use.

Step 2: Unzip Quickstart package

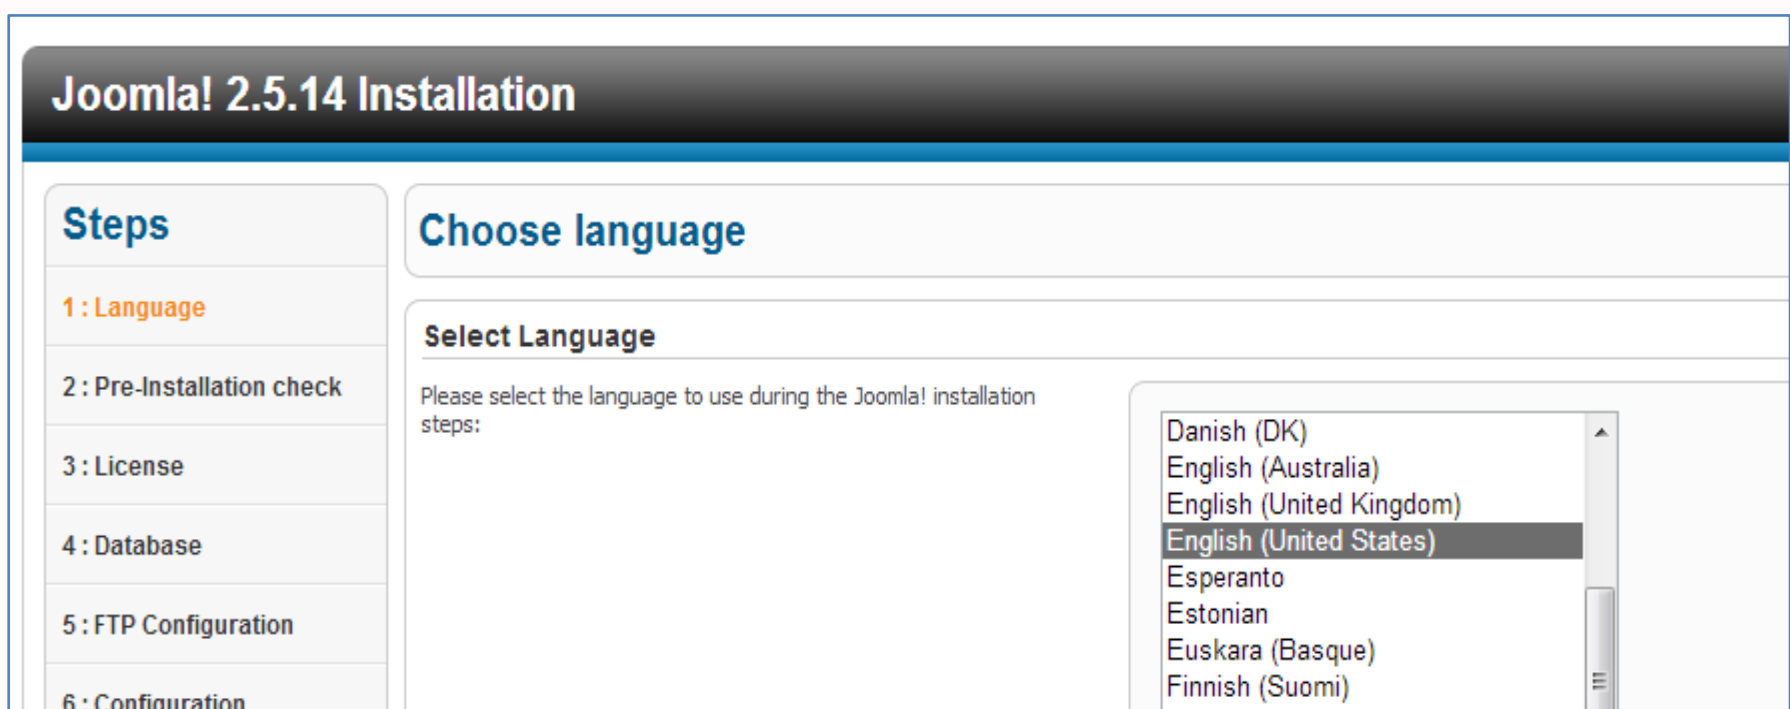

The next step is extracting the file locally identified as quickstart. After the extraction is done, it will contain within all files needed to perform this type of installation.

Step 3: Extract and upload it to your server

Upload all the files into the directory of your website, where you want to install your new Joomla! project. Depending on upload speed of your connection or from your server configuration, this process might take several minutes.

If you don't have any FTP software, we recommend FileZilla - a powerful and free FTP solution.

Step 4 : Files Installation.

Once the page opens it should look something like the image below. Select the language you want to use with your installation and press next.

Joomla! 2.5.14 Installation

Steps

- 1 : Language
- 2 : **Pre-Installation check**
- 3 : License
- 4 : Database
- 5 : FTP Configuration
- 6 : Configuration
- 7 : Finish

Pre-Installation Check

Check Again Previous Next

Pre-installation check for Joomla! 2.5.14 Stable [Ember] 01-August-2013 14:00 GMT:

If any of these items is not supported (marked as **No**) then please take actions to correct them. Failure to do so could lead to your Joomla! installation not functioning correctly.

PHP Version >= 5.2.4	Yes
Zlib Compression Support	Yes
XML Support	Yes
Database Support: (mysql, mysqli)	Yes
MB Language is Default	Yes
MB String Overload Off	Yes
INI Parser Support	Yes
JSON Support	Yes
configuration.php Writeable	Yes

Recommended settings:

These settings are recommended for PHP in order to ensure full compatibility with Joomla!. However, Joomla! will still operate if your settings do not quite match the recommended.

Directive	Recommended	Actual
Safe Mode	Off	Off
Display Errors	Off	On
File Uploads	On	On
Magic Quotes Runtime	Off	Off
Magic Quotes GPC	Off	Off
Register Globals	Off	Off
Output Buffering	Off	On
Session Auto Start	Off	Off
Native ZIP support	On	On

The next page will give you a sense of your server compatibility. You will need to troubleshoot any of the flagged areas that are unsuitable for a Joomla installation before you continue here. Once you get the all clear ... click next again.

Joomla! 2.5.14 Installation

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Install page 3 is the GNU/GPL page, you need to agree to the terms before continuing.

The screenshot shows the Joomla! 2.5.14 installation interface, specifically the 'Database Configuration' step. On the left, a 'Steps' sidebar lists: 1: Language, 2: Pre-Installation check, 3: License, 4: Database (highlighted), 5: FTP Configuration, 6: Configuration, and 7: Finish. Below the list is an icon of a box and a CD. The main area is titled 'Database Configuration' and contains 'Connection Settings'. It explains that Joomla! stores data in a database and provides instructions for remote servers. The 'Basic Settings' section includes fields for: Database Type (Mysqli), Host Name (localhost), Username (fill your username db), Password (fill your password db), Database Name (fill your name db), Table Prefix (g3wqu_), and Old Database Process (Backup/Remove). Each field has a helpful tip on the right.

Install page 4 is the database page. The details you enter here are important as this is where the actual information for your Joomla installation is going to be stored. In a nutshell you need to create a mysql database, a user for the database and then assign that user to the database you created. This step requires a slight detour and we need to open up CPANEL on our server.

Step 5 : Prepare your database

Open the cpanel account on your server. Most of the time you find this by navigating to <http://www.mysite.com/cpanel>. Once you have logged in navigate to the database area of the cpanel account. This may look different on your server depending on the theme ... but the image below shows you what it looks like on one of our servers.

The screenshot shows the 'Create New Database' form in cPanel. It has a text input field labeled 'New Database:' and a 'Create Database' button.

you want to here. Click on the Create database button and you should receive a success message telling you that the database has been created.

The screenshot shows the 'MySQL Users' section with the 'Add New User' form. It includes fields for Username, Password, Password Strength (Very Weak 0/100), and Password (Again). There is a 'Generate Password' button and a 'Create User' button.

Navigate back to the mysql database page and scroll down to where the Create new mysql user input boxes are.

The username and password you put in here are really up to you, but for your Joomla site security its advisable that you use the random password generator if you have it on the page.

After clicking Create New User you should receive the success message and you should then be able to navigate back to the mysql page and scroll down the page again. Take a note of the username and password - as we will need this later.

The screenshot shows the 'Manage User Privileges' form. It displays the current user as 'bowthemes_btalise' and the database as 'bowthemes_btalise'. A table lists various privileges with checkboxes: SELECT, INSERT, UPDATE, DELETE, INDEX, CREATE TEMPORARY TABLES, CREATE, ALTER, DROP, LOCK TABLES, REFERENCES, and CREATE ROUTINE. The 'ALL PRIVILEGES' checkbox is checked. A 'Make Changes' button is at the bottom.

You now need to assign the user to the database. So where it says "Add user to database" select the database and the user you have just created and make sure they appear in the top and the bottom drop down boxes.

Once you have the new user and new database in the select boxes click add. The following screen should appear.

Assign full or all privileges to the user and click "make changes" submit or add user or whichever submit button you have there. You should receive another success message telling you that your user ha been added to the database. You need to pay close attention to the names they use here as the database prefix and user prefix will be needed when filling out the information in the next step. As an example the dummy database we created while doing this tutorial is called test and on our server we can access it by using bowthemes_Magazines.

Step 6: Database Configuration

Select MySQL type of database from drop down list and enter the hostname of the database server Joomla! will be installed on (normally it's "localhost").

This may not necessarily be the same as your Web server, so check with your hosting provider if you are not sure. Enter the MySQL username, password and database name that you previously created on your host control panel. when ready press next.

Step 7: FTP Configuration

The screenshot shows the Joomla! 2.5.14 Installation interface for the FTP Configuration step. On the left is a 'Steps' sidebar with 7 steps: 1: Language, 2: Pre-Installation check, 3: License, 4: Database, 5: FTP Configuration (highlighted), 6: Configuration, and 7: Finish. The main area is titled 'FTP Configuration' and includes a sub-header 'FTP Configuration (Optional - Most Users Can Skip This Step - Press Next to Skip)'. It contains a 'Basic Settings' section with fields for 'Enable FTP Layer' (set to 'No'), 'FTP Username', 'FTP Password', and 'FTP Root Path'. Each field has a warning message: 'Warning! It is recommended to leave this blank and enter your FTP username each time you transfer files.' and 'Warning! It is recommended to leave this blank and enter your FTP password each time you transfer files.' There are buttons for 'Autofind FTP Path' and 'Verify FTP Settings', and a link to 'Advanced Settings'.

The next page is where you configure the ftp settings for the site. The ftp layer was brought into J1.7 as way of helping out with file permissions in some server configurations. Using it is optional and can be initiated later on when using your site. So you can either fill out the details and click next or simply click next.

Step 8 : Main information configuration

The screenshot shows the Joomla! 2.5.14 Installation interface for the Main Configuration step. The 'Steps' sidebar on the left highlights step 6: Configuration. The main area is titled 'Main Configuration' and includes a sub-header 'Main Configuration'. It contains a 'Site Name' section with a text input field containing 'Welcome to BT Magazine'. Below this is a 'Confirm the Admin email and Password' section with fields for 'Your Email' (support@bowthemes.com), 'Admin Username' (admin), 'Admin Password', and 'Confirm Admin Password'. There is also a 'Load sample data' section with a note: 'Important! It is strongly recommended that new Joomla! users install the default sample data. To do this click on the button before moving to the next stage.' and a list of sample data sets: 'Blog English (GB) Sample Data', 'Brochure English (GB) Sample Data', and 'Default English (GB) Sample Data' (selected). An 'Install Sample Data' button is at the bottom.

If you were to perform a normal installation of Joomla, the website name, Administration e-mail and password would be configured on this page. However, you will find these fields purposely inaccessible. Remember, that this version is prepared by Bow Themes.

So after the installation is complete, you can modify your data log without any problems.

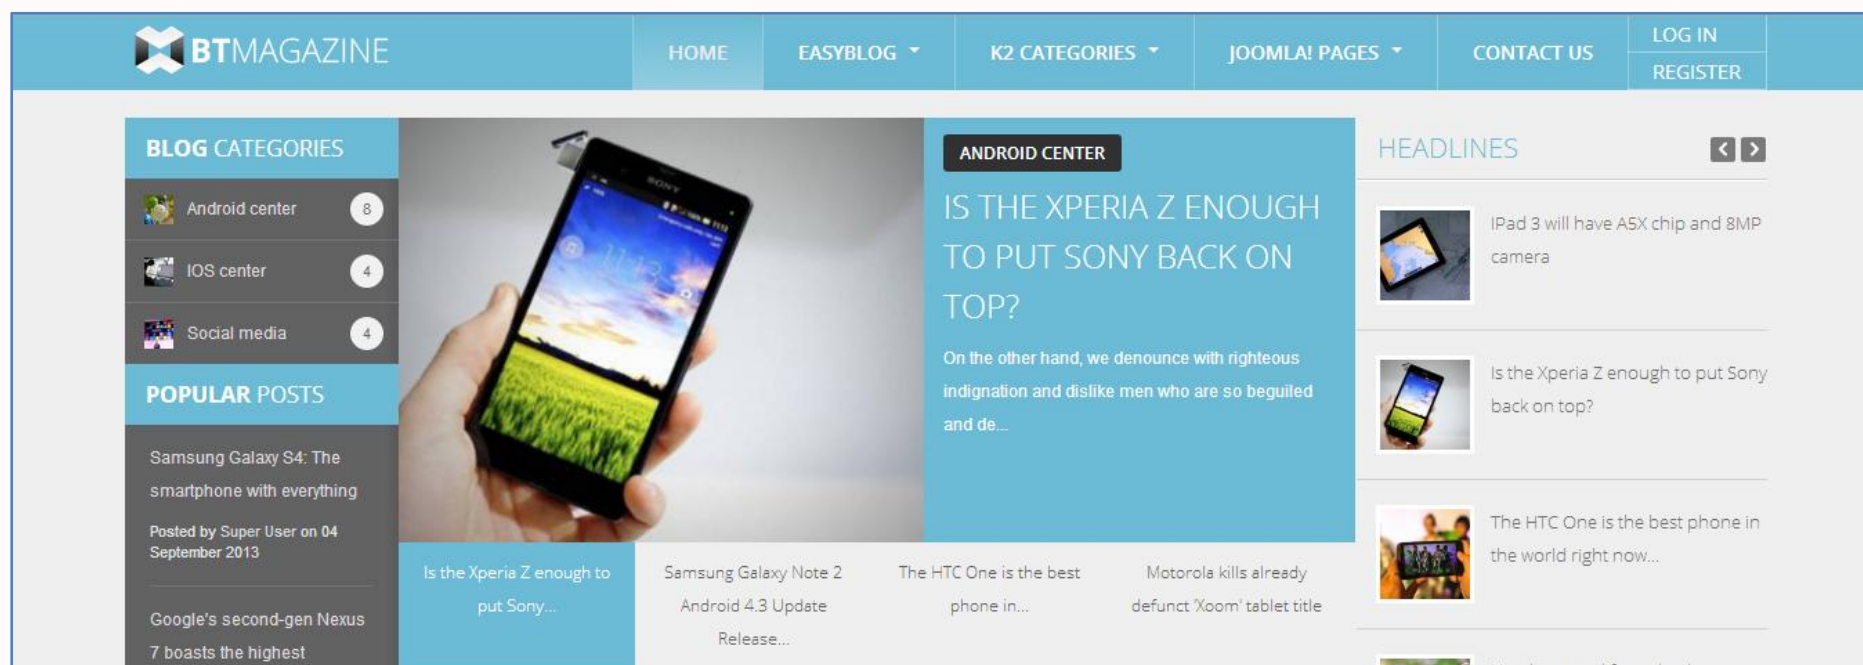

Step 9 : End Installation

The screenshot shows the Joomla! 2.5.14 Installation interface for the 'Remove installation folder' step. The 'Steps' sidebar on the left highlights step 7: Finish. The main area is titled 'Remove installation folder' and contains a large red warning message: 'PLEASE REMEMBER TO COMPLETELY REMOVE THE INSTALLATION FOLDER. You will not be able to proceed beyond this point until the installation directory has been removed. This is a security feature of Joomla!.' There are buttons for 'Site' and 'Administrator' in the top right corner.

Congratulations! The installation is successfully completed. However, before you enjoy your new website, you must delete "installation" directory by Click to button "remove installation folder" or rename/delete it via FTP.

After performing this step, click "Site" button to visit the homepage of your website. You will find the new website fully

2. Partial installation

If you decide to partially install BT Magazine template, we will guide you through following steps:

- *Check if you have the system requirement*

A working installation of Joomla 2.5 or 3.1

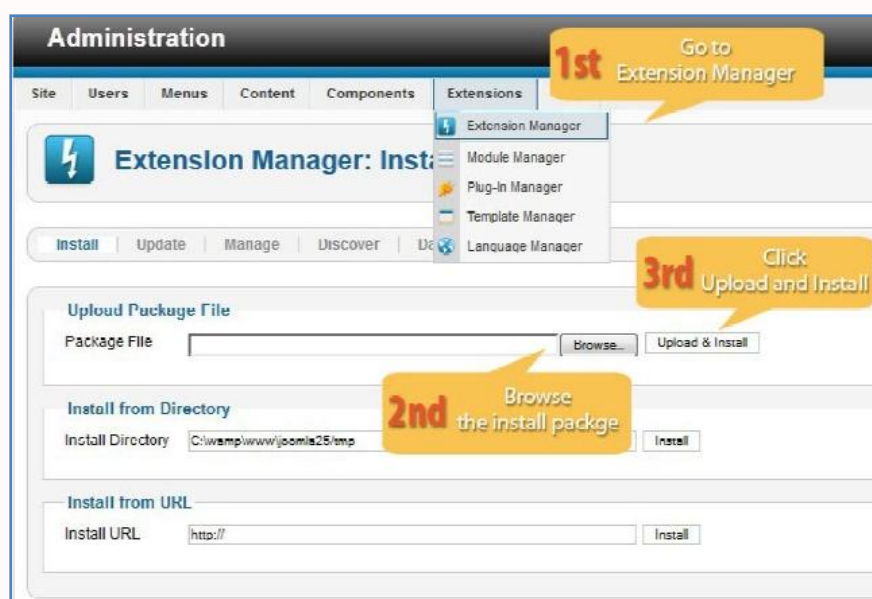

*To install this template you must have a working version of Joomla already installed. For information regarding to installing the Joomla platform, please refer to:

http://docs.joomla.org/Beginners#Install_Joomla.21

- *Install T3 Framework plug-in*

In order to use Bowthemes template, you have to make sure that the plugin T3 Framework is installed and enabled.

Installing T3 Framework: In the Joomla Administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package. Choose file

plg_system_t3.v1.3.1.zip in related extensions package

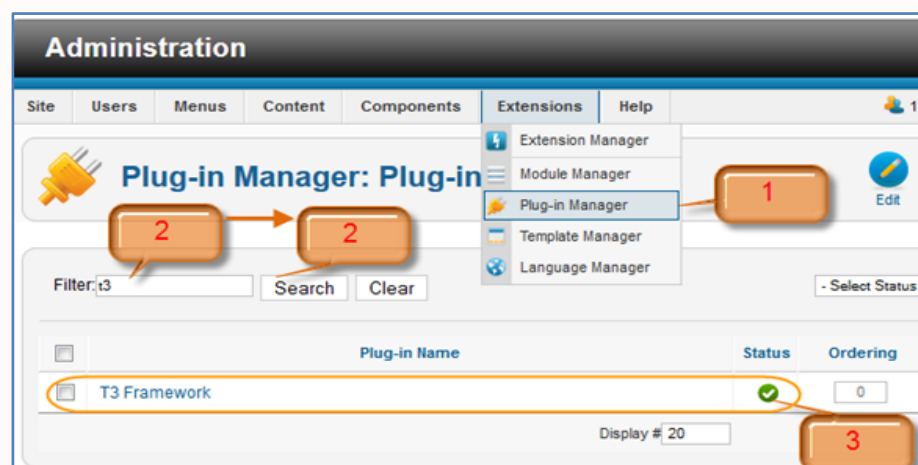

Step 3: Click "Upload & Install"

Enabling T3 Framework: In the Joomla Administration panel, please follow these steps:

Step 1: Go to Plug-in Manager

Step 2: Find T3 Framework's position

Step 3: Check the Status to publish this framework

- *Install BT Magazine template file*

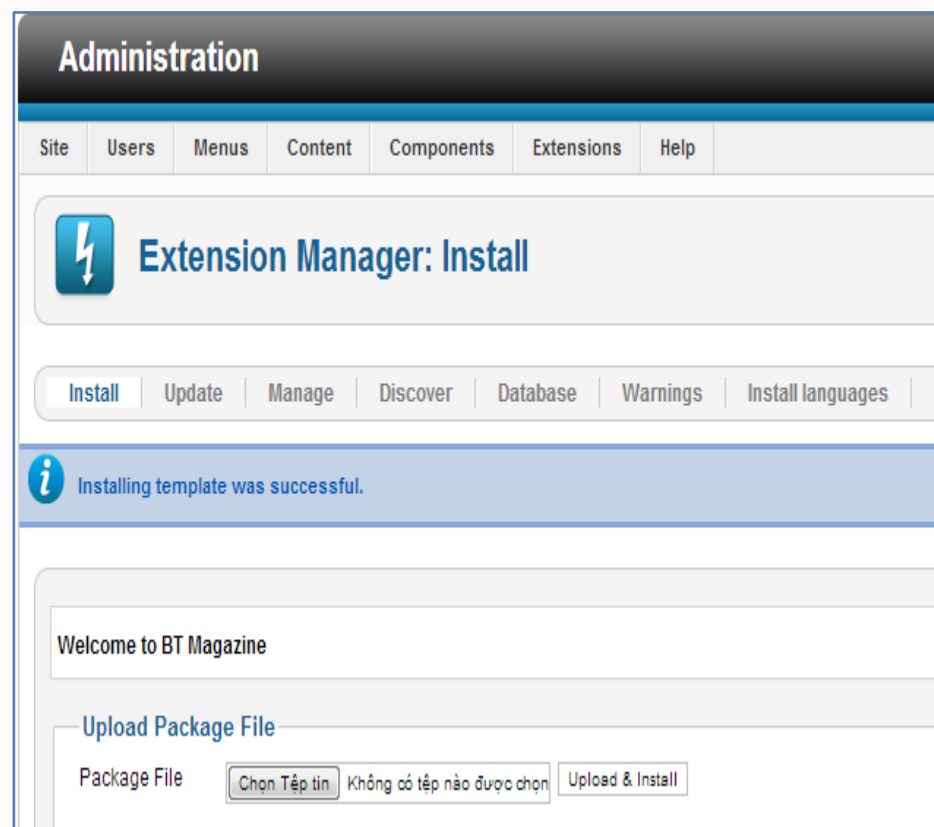

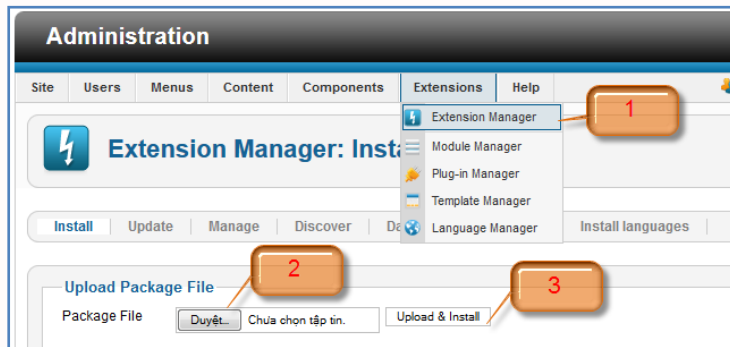

Installing the template: In the Joomla Administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package.

Choose file bt_magazine_template_v1.0.zip

Step 3: Click “Upload & Install”

Publishing the template: In the Joomla Administration panel, please follow these steps:

Styles						
Filter: <input type="text"/> Search <input type="button" value="Clear"/>						
<div> <div>- Select Template -</div> <div>- Select Location -</div> </div>						
	Style	Location	Template	Default	Assigned	ID
<input type="checkbox"/>	Atomic - Default	Site	Atomic	<input type="radio"/>		3
<input type="checkbox"/>	Beez2 - Default	Site	Beez_20	<input type="radio"/>		4
<input type="checkbox"/>	Beez2 - Parks Site	Site	Beez_20	<input type="radio"/>		114
<input type="checkbox"/>	Beez5 - Default	Site	Beez5	<input type="radio"/>		6
<input type="checkbox"/>	Bluestork - Default	Administrator	Bluestork	<input checked="" type="radio"/>		2
<input type="checkbox"/>	bt_magazine - Default	Site	Bt_magazine	<input checked="" type="radio"/>		125
<input type="checkbox"/>	Hathor - Default	Administrator	Hathor	<input type="radio"/>		5
<input type="checkbox"/>	t3_blank - Default	Site	T3_blank	<input type="radio"/>		119

Step 1: Go to Template Manager

Step 2: Find BT Magazine label

Step 3: Check the star icon at “Default” column to make BT Magazine the default template

- *Install BT Magazine related extensions*

Download the package related extensions, namely [BT_Magazine_all_Extensions_Unzip_first.zip](#) and extract it. In the Joomla Administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install extension (Choose the extensions in the related extensions package that you want)

Step 3: Click “Upload & Install”

3. Installing EasyBlog

- *Buy EasyBlog component*
- *Set template default for EasyBlog component*

Please follow our guide to set BT Magazine as default template of EasyBlog component. Firstly, you need to download related extensions package, copy file theme_bowthemes_for_easyblog.zip and paste into this folder:

../components/com_easyblog/themes

Extract this file

Next, go to Administration -> Components -> EasyBlog -> Themes.

The screenshot shows the Joomla! Administration interface. The top navigation bar includes 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The 'Themes' section is active, showing a list of themes. The 'bowthemes' theme is highlighted with a yellow star, and a red arrow points to it with the text 'Set default theme'.

Num	Name	Default	Version	Updated	Author
1	bluedream	☆	3.5	17/01/2012	StackIdeas
2	bowthemes	★	3.5	9/2013	StackIdeas
3	bubbles	☆	3.5	17/01/2012	StackIdeas
4	carbon	☆	3.5	17/01/2012	StackIdeas

Choose Bowthemes Theme (easyblog), this step is necessary to make sure that BT Magazine is the default template

- *EasyBlog configuration*

EasyBlog makes the configuration works easier by giving their user a detailed documentation guide. To master this component, please view this doc at EasyBlog official site:

<http://stackideas.com/docs/easyblog>

Here is the demo link if you want to see this component not in Bowthemes template

<http://demo.stackideas.com>

Working with Template Module positions

“Module” in a Joomla Website is about display contents at front-end the way you want them to do. This section will give you an overview of how BT Magazine template and its modules work together.

*Note: BT Magazine comes with 17 built-in module positions. The number of modules contained in each module position is unlimited. For example: you can have 2 or 3 modules in the left or right module position.

1. BT Magazine – All module positions at a quick glance

The screenshot shows the BT Magazine Joomla template front-end with various module positions annotated. The layout is as follows:

b. “BT Content Showcase” module or “EasyBlog Latest Blogs” module

This is a BT Content Showcase Module or EasyBlog Latest Blogs. Get content from content default joomla, k2 content and easyblog content.

“EasyBlog Latest Blogs” module

- [For Quickstart installation] To change the parameters of the module, please go to Administration -> Select menu Extensions -> Module Manager -> Select position “sidebar-1”, select module EasyBlog Latest Blogs and modify the parameters as you want.
- [For partial installation]You can create this module as below:
 - o Make sure this module have been installed.
 - o Published this module.
 - o Set position as “sidebar-1”
 - o At tab Advanced Options:
 - Set Module class suffix as “_style1”

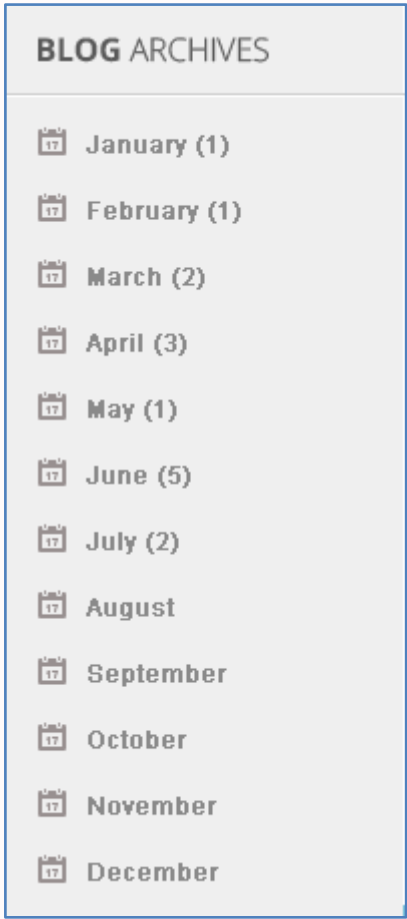

“BT ContentSlider” module

- [For Quickstart installation] To change the parameters of the module, please go to Administration -> Select menu Extensions -> Module Manager -> Select position “sidebar-1”, select module BT Content Slider and modify the parameters as you want.
- [For partial installation] You can create this module as below:
 - o Make sure this module have been installed.
 - o Published this module.
 - o Set position as “sidebar-1”
 - o At tab Global Setting:

- Set layout: default
- Set Module class suffix a s “_style1”
- o At tab Navigation Setting
 - Navigation Position: None
 - Next & Prev Position: No
- o At tab Grid Setting
 - Module Width: auto
 - Row Height: auto
 - Number of rows: 4
 - Number of cols: 1
- o At tab Source Setting: Choose source as you want
- o At tab Item layout Setting
 - Show title: Yes
 - Show intro text: No
 - Show Category Name: No

- Show Read more: No
 - Show date: Yes
 - Show author: Yes
 - Show image: No
- Assign this module to pages that you want.

c. *“EasyBlog Archive” module or “K2 Tool” module*

“EasyBlog Archive” module

- [For Quickstart installation] To change the parameters of the module, please go to Administration -> Select menu Extensions -> Module Manager -> Select position “sidebar-1”, select module EasyBlog Archive and modify the parameters as you want.
- [For partial installation] You can create this module as below:
 - Make sure this module have been installed.
 - Published this module.
 - Set position as “sidebar-1”

“K2 Tool” module

- [For Quickstart installation] To change the parameters of the module, please go to Administration -> Select menu Extensions -> Module Manager -> Select position “sidebar-1”, select module K2 Tool and modify the parameters as you want.
- [For partial installation] You can create this module as below:
 - Make sure this module have been installed.
 - Published this module.
 - Set position as “sidebar-1”
 - At tab Basic Options
 - Layout Calendar Settings: Filter Category as you want

- *Position “content-mass-top”*

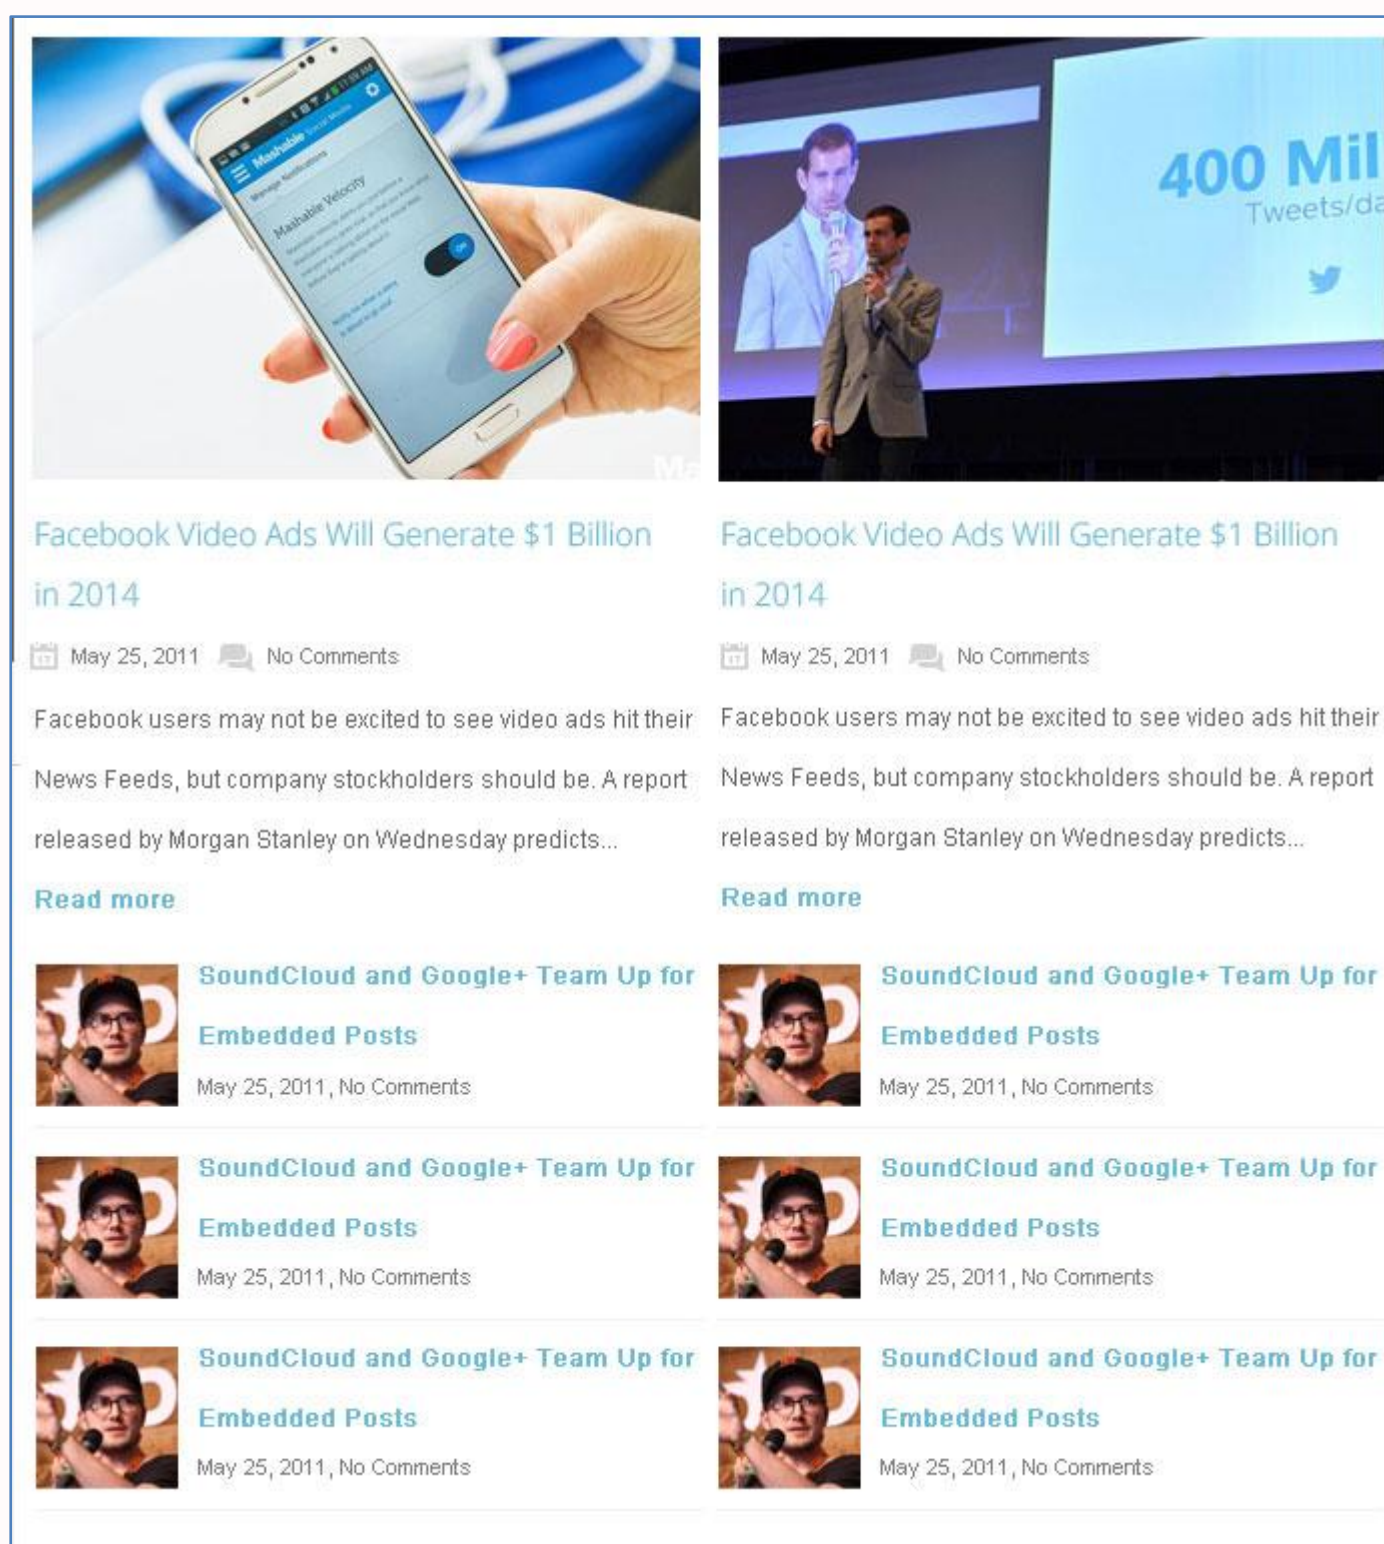

a. *“FrontPage” module – module BT ContentSlider*

- This is the module BTContent Slider with special layout
- Make sure module BT Content Slider have been installed
- This module is placed in position “content-mass-top”
- You can configure this module as below:
 - Global Setting Tab
 - Select layout “frontpageshow”
 - Set navigation bar: None

- Set Next Back: No
- Module Width: Auto
- Source Setting Tab
 - Select source as you want
- Item Layout Setting
 - Show Title: Yes
 - Show Intro Text: Yes
 - Show Category Name: Yes
 - Show Read More: No
 - Show Date: No
 - Show Author: No
 - Show Image: Yes
 - Auto Generate Thumbnail: Yes
 - Thumbnail Width: 403
 - Thumbnail Height: 325
- Assign this module just for item Home page

b. “Blocknews” module – module BT Content Slider

- This is the module BTContent Slider with special layout
- Make sure module BT Content Slider have been installed
- This module is placed in position “content-mass-top”
- You can configure this module as below:
 - Global Setting Tab
 - Set layout: “blocknews”
 - Set navigation bar: None

- Set Next Back: No
- Module Width: Auto
- Source Setting Tab
 - Select source from as you want
 - Select two categories that you want show content
 - Set Number of Articles: 4
 - Limit for each: Yes
- Item Layout Setting
 - Show Title: Yes
 - Show Intro Text: Yes
 - Show Category Name: No
 - Show Read More: Yes
 - Show Date: Yes
 - Show Author: No
 - Show Image: Yes
 - Auto Generate Thumbnail: Yes
 - Thumbnail Width: 71
 - Thumbnail Height: 71
- Assign this module just for Home page

Menu Assignment

Module Assignment: Only on the pages selected

Subscribe

- Auto Generate Thumbnail: Yes
- Thumbnail Width: 71
- Thumbnail Height: 71

- Assign this module to all pages .

b. “Calendar” module- EasyBlog Calendar

- Install the module EasyBlog calendar.
- Set position is “sidebar-2”
- Assign this module to pages that you want.

c. “Top Author” module- EasyBlog Latest Bloggers

- Install the module EasyBlog Latest Bloggers.
- Set position is “sidebar-2”
- Set Module Class suffix is “_nomargin topauthor”
- Assign this module to pages that you want.

d. “Newsletter” module – AcyMailling Module

- Install component AcyMailling
- Publish the AcyMailling Module
- Set position “sidebar-2”
- Basic Option Tab
 - Display Mode “Tableless”

e. "Tag Cloud" modules– K2 Tools module or Easy Blog Tag Cloud module

"K2 Tool" module

- Create a module K2 Tool and configure as below:
 - o Set position is "sidebar-2"
 - o Basic Options Tab
 - Select module functionality: "Tag Cloud"
 - Scroll to Tag Cloud Settings label and set parameters as you want

"Easy Blog Tag Cloud" module

- Install the Easy Blog Tag Cloud module and config as below:
 - o Set position is "sidebar-2"
 - o At Basic Options Tab
 - Layout: "Default (Tag Cloud)"
 - Change parameters as you want

• *Position "footer"*

- [For Quickstart installation] To find this module, please go to Administration -> Select menu Extensions -> Module Manager -> Select position "footer", select this module and modify as you want.
- [For partial installation] You want to create this module. Please do it step by steps:
Go to Administration -> Extensions -> Module Manager -> Click "New" button -> Choose footer module and set position as "footer" or you can choose Custom HTML module, fill your content and set position as "footer"
- Assign this module to all pages.

• *Remove T3 logo*

You can remove T3 logo:

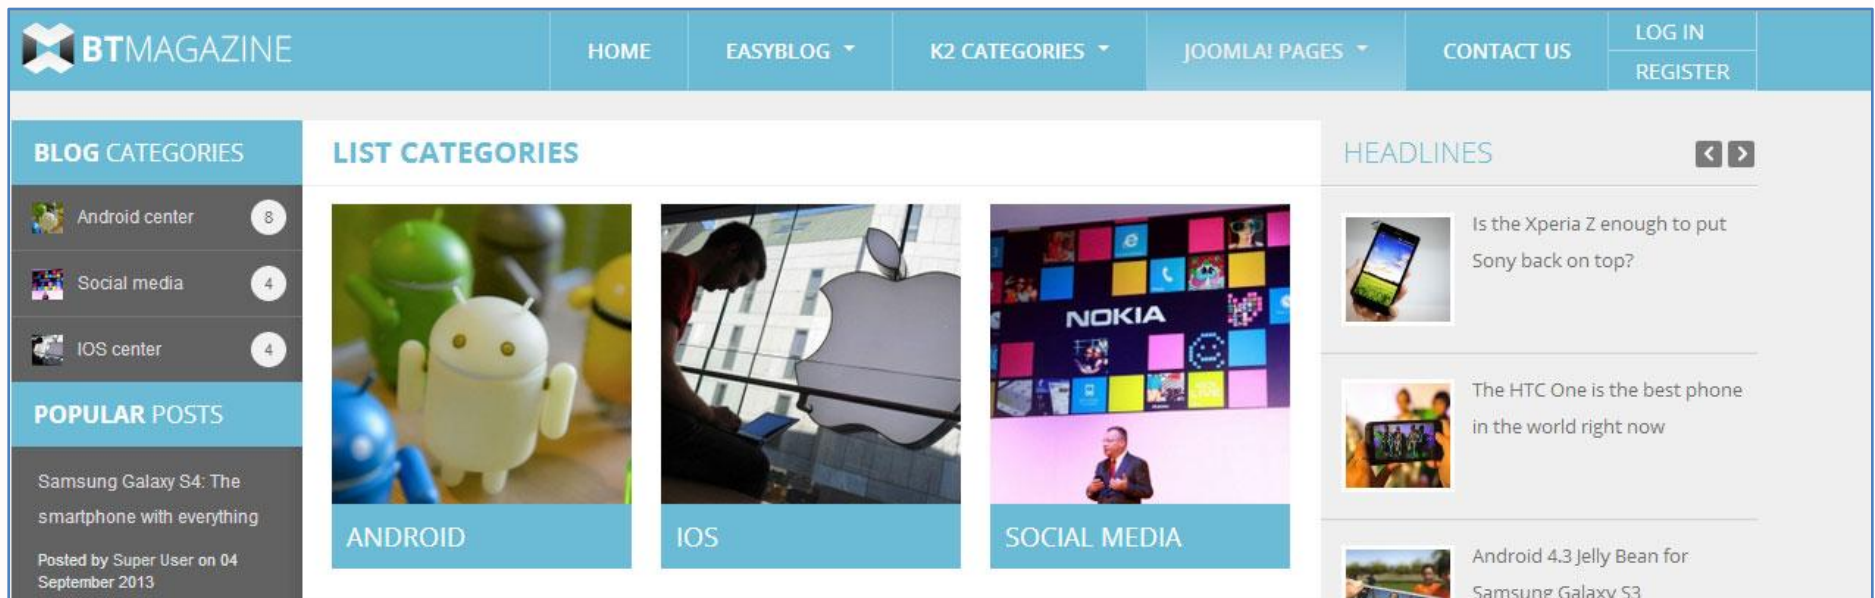

- Go to Administration -> Extensions -> Template Manager -> BT Magazine
- At "General" tab set Show Logo T3 is "No".

How to customize content component

1. Configure global in content component

- Go to administrator -> menu Content -> Articles -> Click tab “Options” at right bar and configuration parameters as you want
- If you want your layout as demo, please preparation:
 - o Intro Images : 215 * 215 (Intro Image Float: left)
 - o Full article image: 650 * 365 (Full Text Image Float: none)

2. Create the category “all” listed all categories as demo

- Go to administrator -> Content menu -> Create a new category named “All”
- Create other children categories with parent is category “All”
- Upload image for each category (size: 215*215)
- Directory tree:
 - o All
 - Android
 - iOS
 - Social media

3. Create the articles in each category

- Go to administrator -> Content menu -> Article Manager -> New
 - o Fill Title, Description, ...
 - o Click tab Images and links
 - Upload image for intro image
 - Upload image for full article image
 - Set Image Float

How to customize content in K2 component

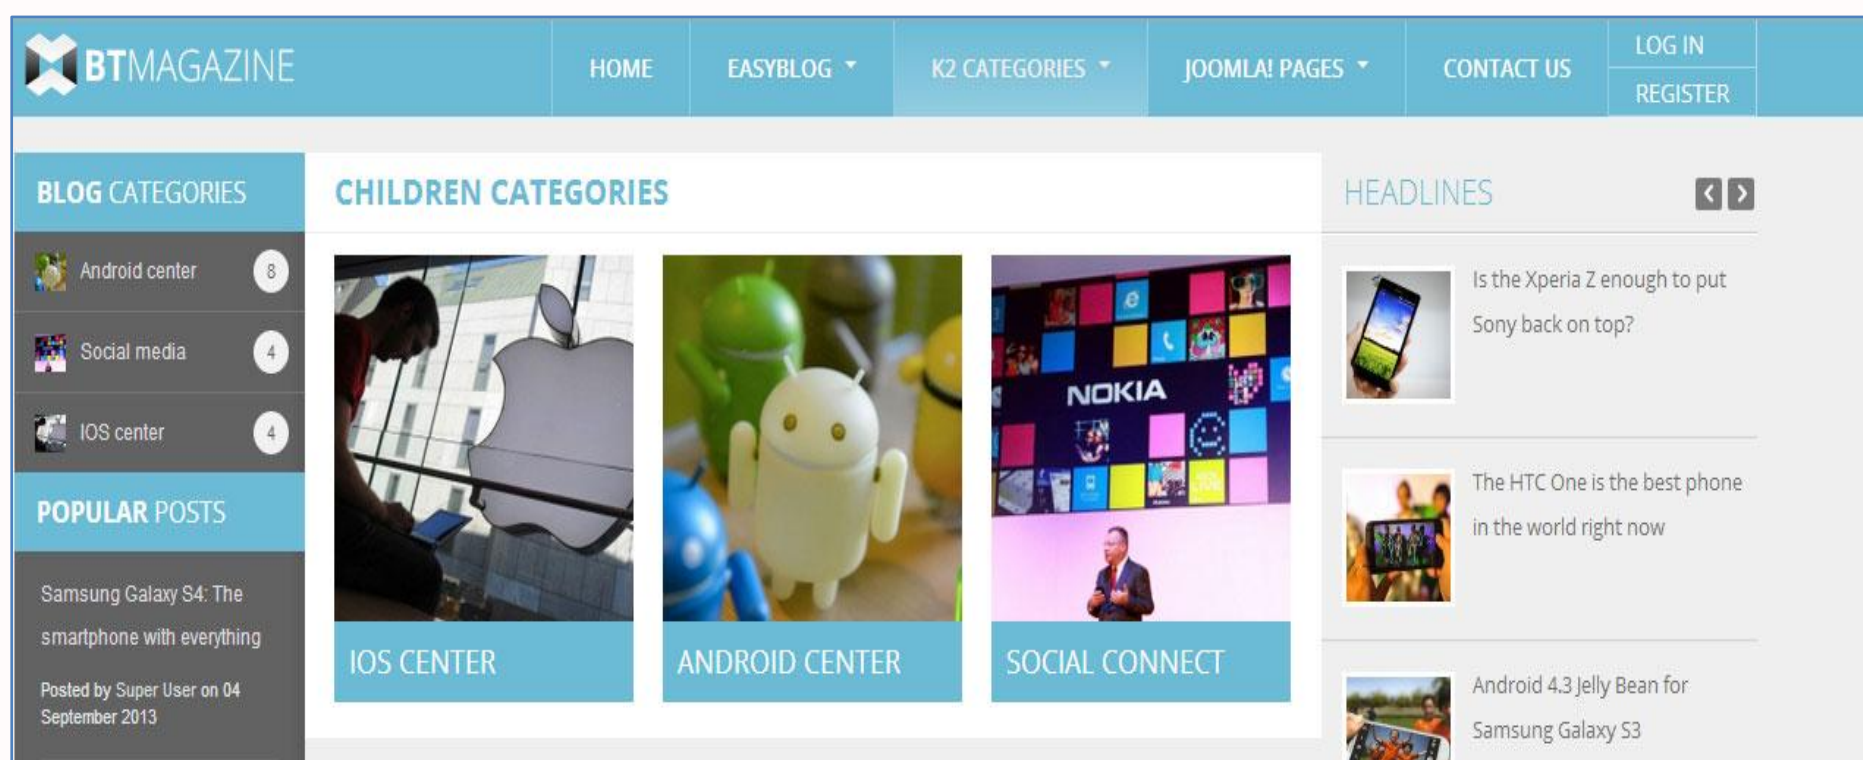

1. Configure images size in K2 component

Image size can be set up at “ Images” tab:

Layout & Views	Content	Images	Social	Comments	Frontend Editing	Advanced	Permissions
Quality (%) used when processing images		100					
Item XSmall image width (in px)		100					
Item Small image width (in px)		150					
Item Medium image width (in px)		215					
Item Large image width (in px)		335					
Item XLarge image width (in px)		650					
Item generic image width (in px). Used in user pages as well as tag, search & date listings.		215					
Category image width (in px)		215					
Placeholder image for category if none exists		<input type="radio"/> Hide <input checked="" type="radio"/> Show					
User image (avatar) width (in px)		100					
Placeholder image for user if none exists		<input type="radio"/> Hide <input checked="" type="radio"/> Show					

2. Create K2 categories listed at front page

In general, K2 Categories display in front-end like this image:

We will guide you how to create and show it in front page:

Step1: Please go to Administration, select “Components” menu -> K2 -> Categories. Create “All categories” and configuration as below:

The screenshot shows the Joomla! K2 Category configuration interface. The main form is titled 'All Categories'. It includes fields for 'Title alias (URL)' set to 'all-categories', 'Parent category' set to '-- None --', 'Inherit parameter options from category' set to '-- None --', 'Associated "Extra Fields Group"' set to '-- None --', 'Published' set to 'Yes', 'Access level' set to 'Public', and 'Language' set to 'All'. Below these fields is a 'Description' tab with a rich text editor containing the text 'all categories'. On the right side, the 'Category item layout' panel is expanded, showing a 'Layout grid' section with the following settings: 'Leading count' set to 0, 'Columns for leading' set to 0, 'Image size for leading items' set to 'XLarge', 'Primary count' set to 0, 'Columns for primary' set to 2, 'Image size for primary items' set to 'Medium', 'Secondary count' set to 0, 'Columns for secondary' set to 1, 'Image size for secondary items' set to 'Small', 'Links count' set to 0, and 'Columns for links' set to 1. Red arrows point to the 'Leading count', 'Primary count', and 'Secondary count' fields with the text 'Show number leading items in category', 'Show number primary items in category', and 'Show number secondary items in category' respectively.

Step2: Create the child categories and configuration as below:

The screenshot shows the Joomla! K2 Category configuration interface for a child category named 'IOS center'. The 'Title' is 'IOS center' and the 'Title alias (URL)' is 'ios-center'. The 'Parent category' is set to 'All', with a red arrow pointing to it and the text 'Select parent category'. The 'Inherit parameter options from category' is set to '-- None --'. The 'Associated "Extra Fields Group"' is set to '-- None --'. The 'Published' status is 'Yes'. The 'Access level' is 'Public'. The 'Language' is 'All'. Below these fields is a 'Description' tab with a rich text editor. On the right side, the 'Category item layout' panel is expanded, showing a 'Layout grid' section with the following settings: 'Leading count' set to 1, 'Columns for leading' set to 1, 'Image size for leading items' set to 'Medium', 'Primary count' set to 2, 'Columns for primary' set to 1, 'Image size for primary items' set to 'Medium', 'Secondary count' set to 2, 'Columns for secondary' set to 1, 'Image size for secondary items' set to 'Medium', 'Links count' set to 0, and 'Columns for links' set to 0. Red arrows point to the 'Image size for leading items', 'Primary count', and 'Secondary count' fields with the text 'Set size image display on list items', 'Set number primary items', and 'Set number secondary items' respectively.

Step3: Create an menu item that links to all categories.

Go to Administration -> Menus -> Main Menu -> Create new menu item. Set Menu Title is K2 Category. Configuration this menu as below:

The screenshot shows the Joomla! Menu Item configuration interface. The 'Menu Item Type' is set to 'Categories'. The 'Menu Title' is 'K2 categories'. The 'Alias' is 'k2-category'. The 'Link' is 'index.php?option=com_k2&view=itemlist&layout='. The 'Status' is 'Published'. The 'Access' is 'Public'. The 'Menu Location' is 'Main Menu'. The 'Parent Item' is 'Menu Item Root'. The 'Ordering' is 'K2 categories'. The 'Target Window' is 'Parent'. On the right side, the 'Basic Options' panel is expanded, showing a 'Select one or more categories' section with a list of categories: 'All', 'IOS center', 'Android center', and 'Social connect'. The 'Fetch items from children categories' checkbox is checked.

3. Create K2 categories listed at front page

We have two layouts for Categories page

- Layout default
- Layout grid

a. Layout default (Category IOS CENTER)

BLOG CATEGORIES	IOS CENTER	HEADLINES
<ul style="list-style-type: none"> Android center 8 Social media 4 IOS center 4 	<div>  <p>SUPER USER 11 SEPTEMBER 2013 NO COMMENT</p> <h4>IPHONE 5 BATTERY LIFE IS SIGNIFICANTLY REDUCED BY IOS 7</h4> <p>Aenean sed ante arcu. ▼ Required Settings

Select Contact *: **Select your contact**

► Contact Display Options

► Mail Options

► Link Type Options

► Page Display Options

► Metadata Options

► Module Assignment for this Menu Item

Customize the look of your template

Note: For more convenient work and prevention of losing your styled file, we therefore suggest writing down your style in **custom.css** file. To overwrite old style, you may need to use **!important** css declaration for your style.

For example: .logo-image a{
background: url("../images/yourlogo.png")!important;
}

- Changing Logo, Main Menu, Favicon and website Title

a. Changing Logo

There are two ways to change logo image located on top of the template:

1st way

Just replace the logo.png on your template folder with the one you want on the top of your site (rename the image file in png first). The folder's path is: ...\\templates\\bt_magazine\\images

2nd way

Template Manager

Edit Style

Save

</> Compile LESS to CSS

Select

x

Please go to Administration, select Extensions ->Template Manager -> Template BT Magazine -> Tab Theme -> Upload your logo

Then open file:

...\\templates\\bt_magazine\\css\\custom.csst o change width and height of your logo:

```
.logo-image a{
width: yourwidthlogo!important;
height: yourheightlogo!important;
}
```

b. Configuration of Main Menu

Please go to Administration -> menu Extensions -> Template Manager -> BT Magazine -> Tab Navigation and change the configuration the way you like:

www.bowthemes.com

Dropdown Trigger	Mouse Hover	
Off-Canvas Navigation	No Yes	You can change event to trigger dropdown menu
Always show submenu	No Yes	Configuration show submenu
Navigation Type	Megamenu	Select type of menu (Megamenu or menu default of joomla)
Animation	Fading	
Duration	400	
Menu	<div> Main Menu About Joomla Australian Parks Fruit Shop Main Menu Top </div>	

Choose the menu that you want show

c. Changing Favicon

Create your favicon. Replace file favicon.icon in folder template bt_Magazines. Then clear cache browser.

d. Changing Website Title

In Administration page: Select "Site" menu → Global Configuration -> Change your website title.

• Changing Template Layout and Style

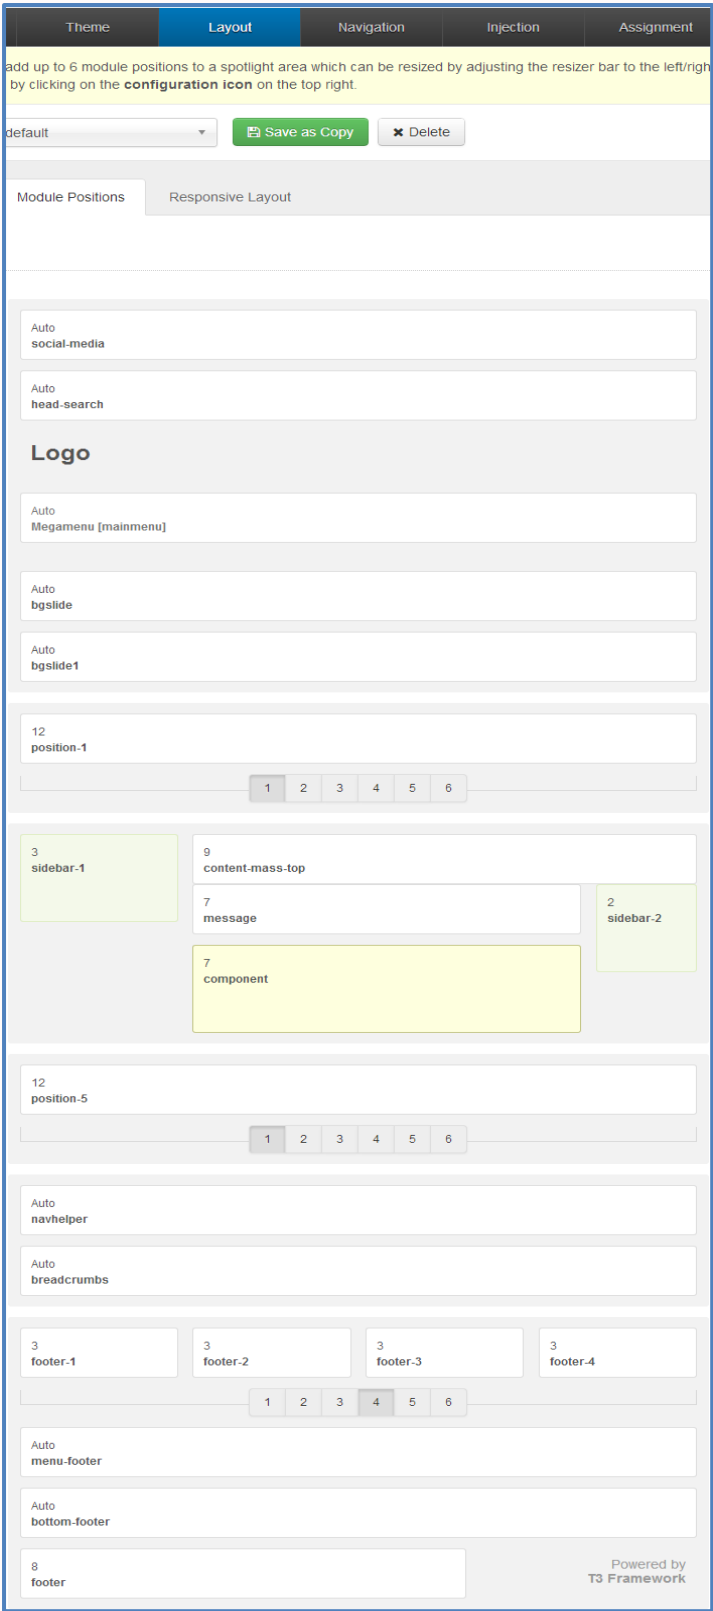

The BT Magazine template comes with one default layout made up of 3 columns:

The layout parameters are contained in XML files which can be customized from the templates Administration panel, to generate these following layouts: default-content-left, default-content-right.

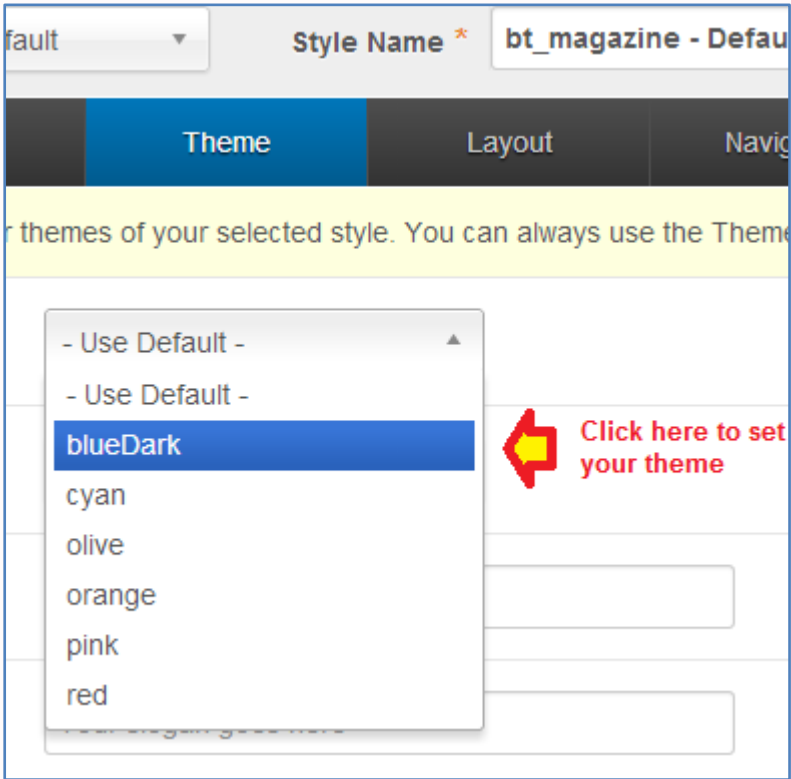

You can also customize the positions by simply moving the blocks around.

For an in-depth read on layout customization, please check out article about JA T3 Framework on the Wikipedia:

http://wiki.joomlart.com/wiki/JA_T3_Framework_2/Guides#Default_Layout

a. Changing Template color

In back-end page: Select Extensions menu → Template manager →BT_Magazine→ Theme -> Select a color theme.

b. Changing Font style

We used Google Font for module title and page header. To change font style, you may have to :

- Search for another Google font

- Go to this file: [../templates/bt_magazine/tpls/blocks/head.php](#) line 49

<link href='http://fonts.googleapis.com/css?family=Open+Sans:300italic,400,300,600,700,800' rel='stylesheet' type='text/css'>

- Change the link appeared here by the new google font.
- Next, open the file: [.../templates/bt_magazine/less/variables.less](#) line 79
@headingsFontFamily: 'Open Sans'; // empty to use BS default,
- Change font Open Sans by your font name.
- Then go to Administration, menu Extensions -> Template Manager -> template BT Magazine -> click button "Compile Less to Css".

c. Changing Module Styles

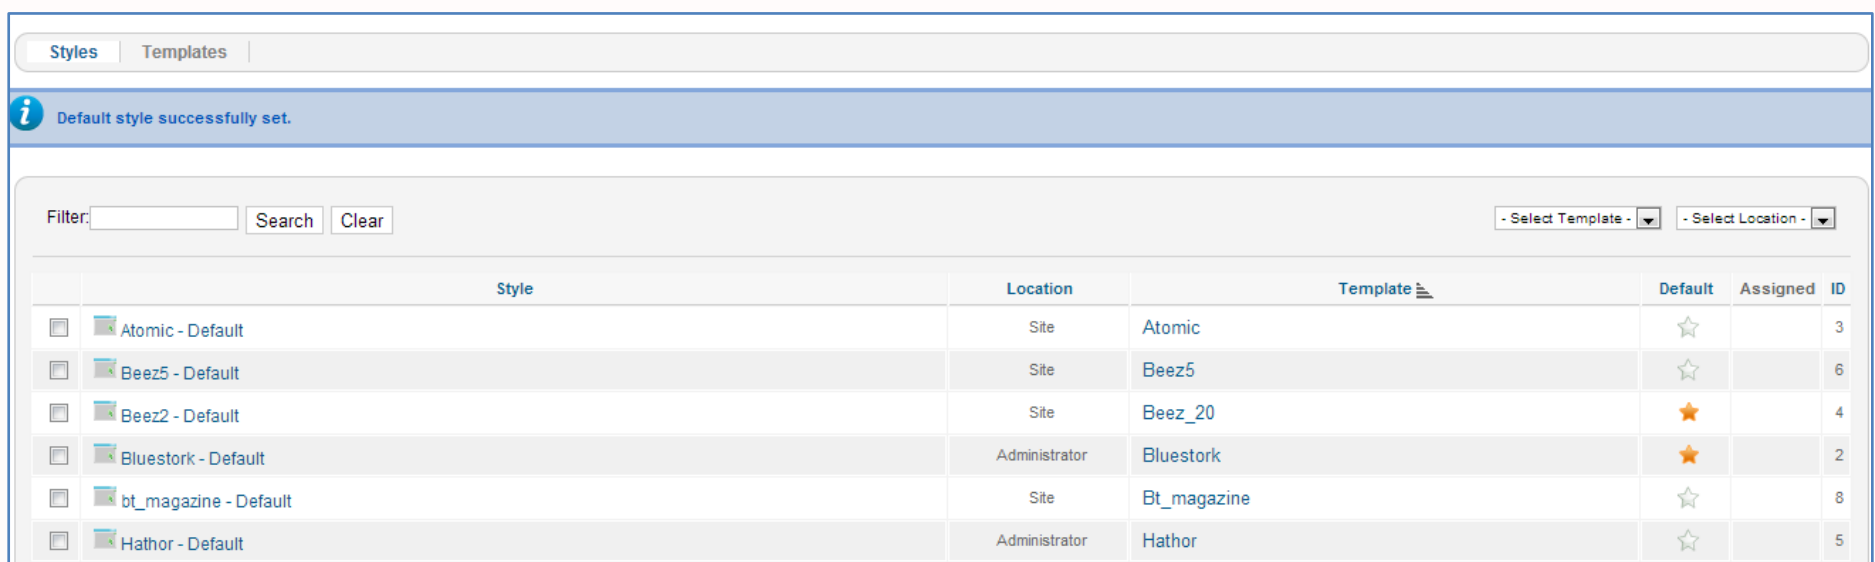

If you just want to make little changes, please write your style on the file [../templates/bt_Magazines/css/custom.css](#) and use **!important** attribute to overwrite old style.

How to upgrade your template

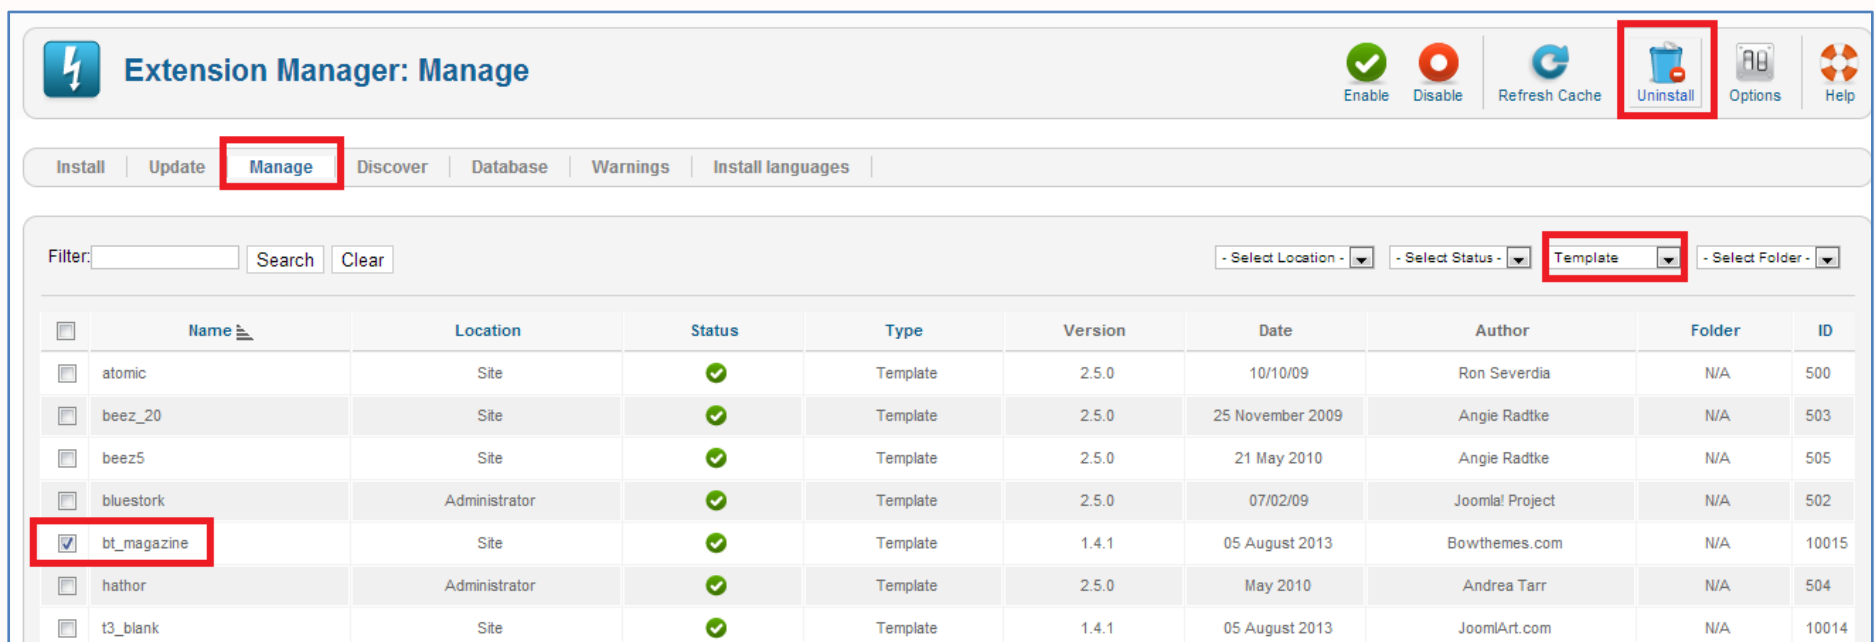

Bowthemes frequently upgrade our templates to catch up with new Joomla trends and prevent our customer from site-hackers. That's why template re-installation is must-have skill. Here is how to do it:

- Create a backup of your template.
- Uninstall template.
- In the Joomla Administration panel:

Preparation step: Set another template (not BT Magazine) as default Site template.

Action steps: Go to Extension Manager → Select Manage → Select filter criteria in “Type” box is template → Find “BT Magazine” label → click the checkbox. After all, hit “Uninstall” button

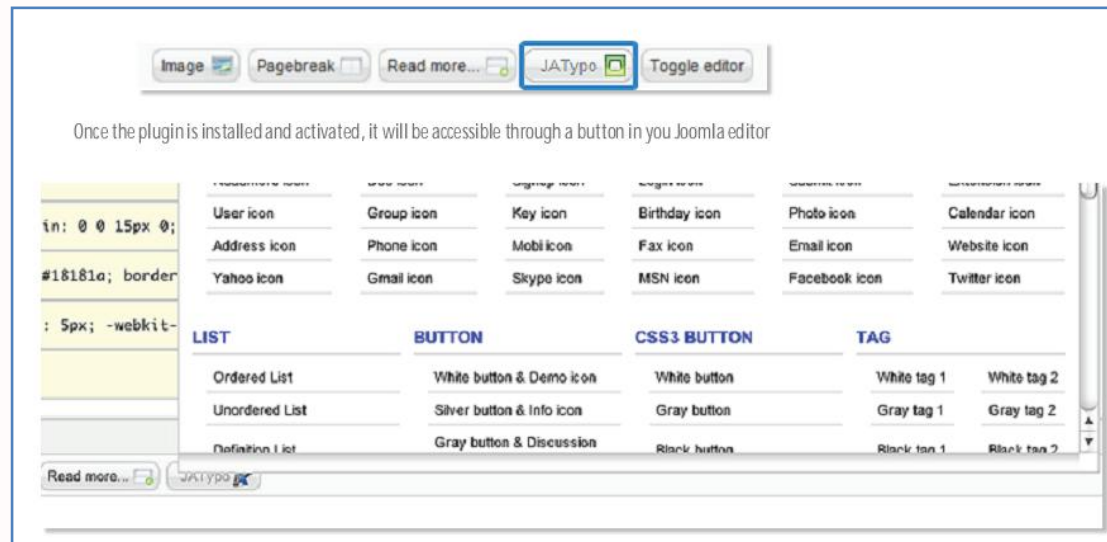

- Reinstall template.
 - Download the upgrade package of template and install it.
 - Go to menu Extensions -> Template Manage -> Set “Default” for newly installed template.
 - Replace the code that you have changed

Typography

The typography of the template is managed by the T3 typo system plug-in. This plug-in allows you to utilize advanced typography in your content

Before you begin the installation process, you need to ensure that this plug-in is installed and activated. It can be installed like normal Joomla Extension through Extension Manager. Check the Plug-in manager to activate it.

From now on, you can use it to style your content just by clicking the JA Typo button and select the style you want from the popup.
