Introduction

BT Mobile App is Free, Full-Responsive Joomla Template based on JAT3 Framework. This template help market your online business such as mobile application development and other corporate portfolio presentation.

“Released on 2012 Christmas and New Year season, this is our best wishes to you as 2013 is coming. Thanks for supporting and encouraging us to do our best. Joomla 4ever!”

Bowthemes Team

1. Template Features

- Running on T3 Framework Version 3 for Joomla 2.5
- 06 Colors themes support, 01 Menu type options
- Inbuilt Google Fonts configuration
- Pricing table and Meet our team sample page design
- 20+ module positions and various module class suffix
- Improved style of Joomla! Core system pages.
- Multiples modules suffix's build-in template for module styling.
- K2 blog layouts and Joomla blog layout
- Inbuilt CSS and Javascript Compression
- Template support for MooTools 1.2
- Delivered with source Adobe .PSD files
- Compatibility with Joomla 2.5
- Cross Browser Support: IE8+, Firefox 2+, Safari 3+, Chrome 8+, Opera 9+

2. Compressed File Contents

The BT Mobile Apps Template zipped in file has contents such as following:

- Extensions (components, modules and plug-ins)
- Documentation
- License
- Photoshop files
- Quickstart
- Screenshots

- All the files are contained in a zip archived. You need to extract them by using Winrar, Stuffit or your archiving tools

3. Accompanying Extensions

This template comes with 04 powerful extensions:

- BT Content Slider
- BT Login
- BT Google Maps
- BT Twitter Feeds

Installing

1. System Requirement

- A working installation of Joomla 2.5

*To install this template you must have a working version of Joomla already installed. For information regarding to installing the Joomla platform, please refer to:

http://docs.joomla.org/Beginners#Install_Joomla.21

- T3 framework plug-in installed and enabled.

2. T3 Framework Plug-in

In order to use Bowthemes template, you have to make sure that the plugin JAT3 Framework is installed and enabled.

- Installing T3 Framework 3 for Joomla 2.5

In the Joomla administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package

Step 3: Click "Upload & Install"

- Enabling T3 Framework

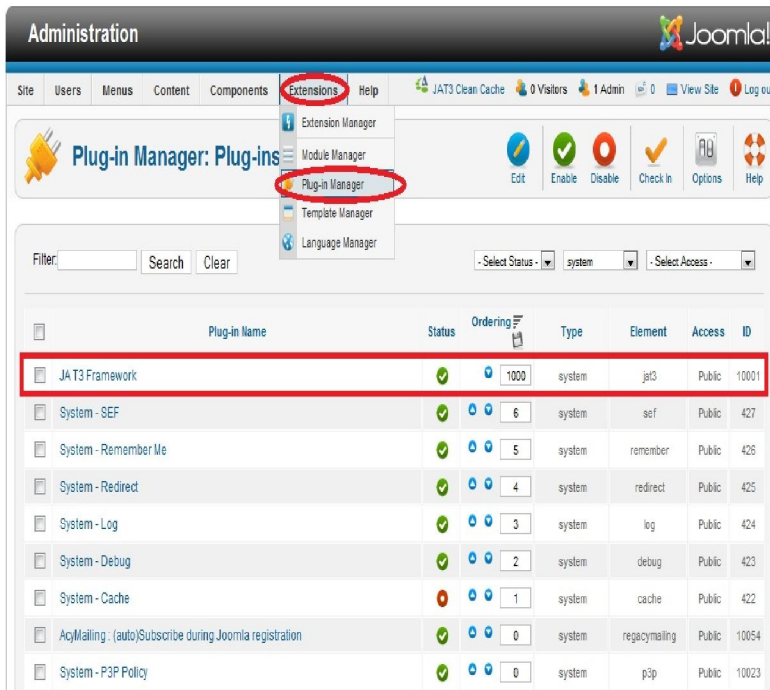

In the Joomla administration panel, please follow these steps:

Step 1: Go to Plug-in Manager

Step 2: Find JAT3 Framework's position

Step 3: Check the Status to publish this framework

Step 4: Save the change

Notification

You may get some errors using JAT3 v.3 version. To ensure good operation of the website, after installation, please rename or delete some modules and components at this address

[plugins\system\jat3v3\t3v3base/html](#).

- Component Com_content
- Module Com_search

3. BT Mobile Apps Template

- Installing the template

In the Joomla administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package

Step 3: Click "Upload & Install"

The template file name is:

[bt_mobile_apps_template_j!25_v1.1.zip](#)

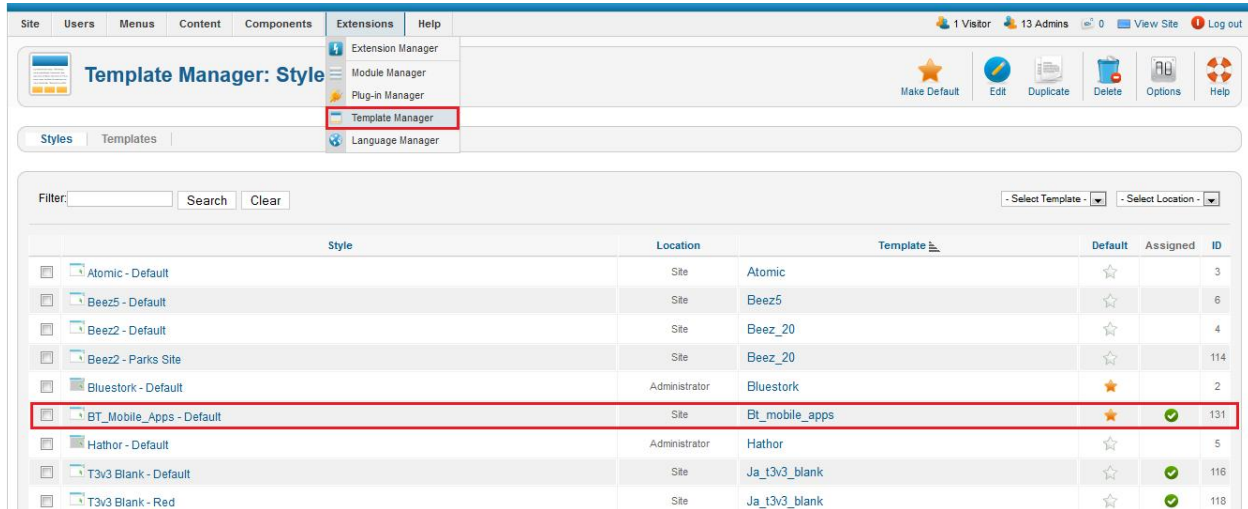

- Publishing the template

In the Joomla administration panel, please follow these steps:

Step 1: Go to Template Manager

Step 2: Find “BT Mobile Apps” position

Step 3: Check the star icon at “Default” column to make BT Mobile Apps the default template

- Installing needed plug-in components and module

The installation procedure is the same as installing the template

4. *BT Mobile Apps Quickstart package*

- How a Quickstart package works?

A Quickstart package is a total Joomla website installation kit that installs the template and all of the components and plug-ins onto your server at once.

Bowthemes provides quickstart package for each template which aims to easy to use and comfortable for users. It will help you save much time of installing and configuring if you plan to start your site from the beginning. Installing Quickstart package is quite easy as you install normal Joomla!

- How to install a Quickstart package

Please refer this instruction in Bowthemes Website:

<http://bowthemes.com/how-to-install-bow-themes-template-quickstart-pack.html>

Module Configuration

The example below show how to configure Bowthemes modules to make them display in your template like the way they do in [the demo page](#).

Template Customization

1. Changing logo in header

There are two ways to change logo image located on top of the template:

- 1st way

Just replace the **logo.png** on your template folder with the one you want on the top of your site (rename the image file in png first). The folder's path is:

...\templates\bt_mobile_apps\images.

- 2nd way

Open file: ...\\templates\\bt_mobile_apps\\css\\template.css

- On line 2148: Replace the name "**logo.png**" by your logo's name
- On line 2149 and 2150: Replace logo's height and width here

2. Changing logo in footer

In administrator, go to Extensions -> Module Manager, find the position "logo-footer" and upload your image logo (Logo footer is custom html module).

3. Changing color theme

The templates administration panel allows you to customize a lot of features regarding the template layout, color profile and other settings like file compressions. Once you've installed the template, the first decision you have to make is which profile you are going to use for your site.

You can also select any of the other profile as your primary profile:

- Open the template's administration panel
- Click on the profile tab and scroll down to the advanced settings to use for your site
- Select the profile you want to use

There are six profiles included in the template. A default profile is already loaded. This profile is the backbone of the template.

In the “Theme” section, please click on “Use Default”. A pop up will display the profiles list. Select your desired profile by ticking the little box to the right, then click “Save”.

Scroll up the page and save the changes you just made.

Template Layout

The BT Mobile Apps template comes with one default layout made up of 3 columns:

Sidebar-1 – main – sidebar-2

The layout parameter are contained in XML files which can be customized from the templates administrator panel, to generate these following layouts: home-1, home-2

The screenshot shows the 'Layout' configuration section of the BT Mobile Apps template administrator panel. At the top, there is a navigation bar with tabs: 'Layout', 'Theme', 'Navigation', 'Assignment', and 'Footer'. Below the navigation bar, there is a dropdown menu for 'Layout' set to 'default'. A yellow tooltip message states: 'you can add up to 6 module positions to a spotlight area which can be resized by adjusting the resizer bar to the left/right. The position is set by clicking on the configuration icon on the top right.' Below this, the 'Positions Configuration' section is visible, with a sub-header 'Select the Positions that are going to be used in the above selected layout.' The main area displays a grid of module positions. On the left, there is a vertical list of positions: 'Logo', 'Auto mainnav', 'Auto head.slide', 'Auto heading-search', 'Auto content-mass-top', '3 sidebar-1', '6 message', '3 sidebar-2', '6 contenttop', '6 component', 'Auto content-mass-bottom', 'Auto navhelper', '4 footer-1', '3 footer-2', '5 footer-3', '1', '2', '3', '4', '5', '6', 'FOOTER BY', '8 footer', and '4 social'. On the right, there is a grid of positions: '4 head-search', '6 message', '3 sidebar-2', '6 contenttop', '6 component', 'Auto content-mass-bottom', 'Auto navhelper', '4 footer-1', '3 footer-2', '5 footer-3', '1', '2', '3', '4', '5', '6', 'FOOTER BY', '8 footer', and '4 social'.

You can also customize the positions by simply moving the blocks around.

For an in-depth read on layout customization, please check out article about JA T3 Framework on the Wikipedia:

http://wiki.joomlart.com/wiki/JA_T3_Framework_2/Guides#Default_Layout

Template Profile

The template contains six color profiles:

- Default
- Cyan
- Green
- Xmas
- Olive
- Violet

You can manage these profiles through the profiles panel found in the template administration panel.

Belows are the visual settings for themes of your selected style. You can always use the ThemeMagic tool located on the top-right panel for further advanced settings. ?

Theme	- Use Default -
Logo Type	- Use Default -
Logo Image	cyan green olive violet xmas

Assign the current template style to the selected menu items that can be viewed by users. ?

With this panel, you are free to create, clone, edit, delete (your own) profiles. In addition, for each profile you can customize all template settings: logo, font-size, layouts, menu system, color theme, text-direction, etc. All these settings are split into several sections as you can see in the illustrated image. You can easily select a profile as your default profile for your website as well.

Module Variations

There are some special module styles, namely:

- “_login”
- “_menu”
- “_content”
- “_twitter”
- “_slideshow”
- “_user”

Each style is activated by assigning a module class suffix to the module. You can see more details on the page:

www.bowthemes.com/images/templates/bt-mobile-apps-index.jpg

*Special module styles

Other module styles

Special Module Styles

Use module suffix: `_badge badge-top` to put this badge on any module you like

Use module suffix: `_badge badge-pick` to put this badge on any module you like

Use module suffix: `_light` to put this badge on any module you like

Use module suffix: `_badge badge-new` to put this badge on any module you like

Use module suffix: `_badge badge-hot` to put this badge on any module you like

Use module suffix: `_dark` to put this badge on any module you like

Subscribe And Get The Inside Scoop

Your Email Address

Subscribe

Use module suffix: `_newsletter` to use this style on a newsletter subscription form

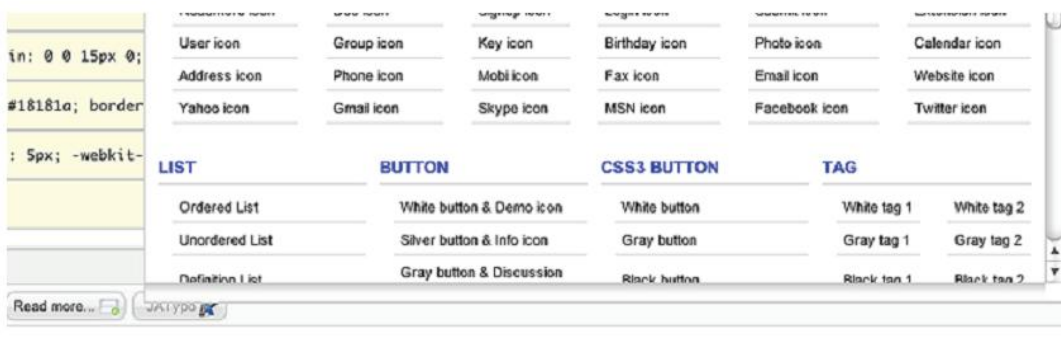

Typography

The typography of the template is managed by the T3 typo system plug-in. This plug-in allows you to utilize advanced typography in your content

Before you begin the installation process, you need to ensure that this plug-in is installed and activated. It can be installed like normal Joomla Extension through Extension Manager. Check the Plug-in manager to activate it.

Once the plugin is installed and activated, it will be accessible through a button in you Joomla editor

From now on, you can use it to style your content just by clicking the JA Typo button and select the style you want from the popup.
