Introduction

BT Arise is the first free template for Joomla 1.6 and 1.7 of BowThemes Club, frequently used as Corporate website template. Because of its clean and multi-purpose design, still now, BT Arise is always one of the most downloaded free templates. This is a good start for many professional templates released by us. It's our commitment that all our templates are going to be elegant, professional designed and coded by our team of experts.

1. Template Features

- Running on T3 Framework Version 2
- 05 Colors themes support, 04 Menu type options
- Inbuilt Google Fonts configuration
- 20+ module positions and various module class suffix
- Improved style of Joomla! Core system pages.
- Multiples modules suffix's build-in template for module styling.
- Inbuilt CSS and Javascript Compression
- Template support for MooTools 1.2
- Delivered with source Adobe .PSD files
- Compatibility with Joomla 2.5, Joomla 1.6 and Joomla 1.7
- Cross Browser Support: IE7+, Firefox 2+, Safari 3+, Chrome 8+, Opera 9+

2. Compressed File Contents

The BT Arise Template zipped in file has contents such as following:

- Extensions (components, modules and plug-ins)
- Documentation
- License
- Photoshop files
- Quickstart
- Screenshots
- All the files are contained in a zip archived. You need to extract them by using Winrar, Stuffit or your archiving tools

3. Accompanying Extensions

This template comes with 06 powerful extensions:

- BT Slideshow module
- BT Content Slider module
- BT Social Plug-in
- BT Login Module
- BT Twitter Feed
- BT Facebook Likebox

Installing

1. System Requirement

- A working installation of Joomla 2.5 or 1.6 or 1.7

*To install this template you must have a working version of Joomla already installed. For information regarding to installing the Joomla platform, please refer to:

http://docs.joomla.org/Beginners#Install_Joomla.21

- T3 framework plug-in installed and enabled.

2. T3 Framework Plug-in

In order to use Bowthemes template, you have to make sure that the plugin JAT3 Framework is installed and enabled.

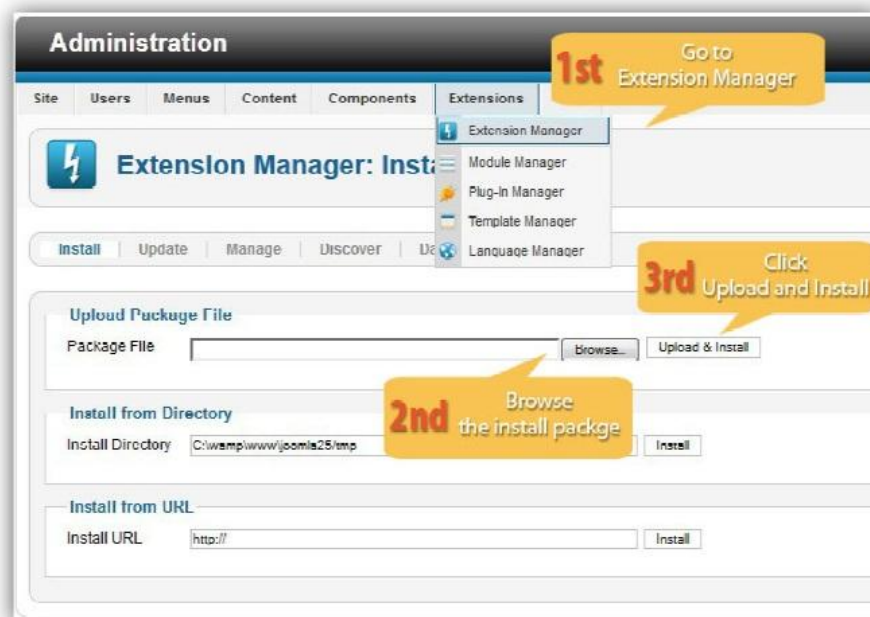

- Installing T3 Framework

In the Joomla administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package

Step 3: Click "Upload & Install"

- Enabling T3 Framework

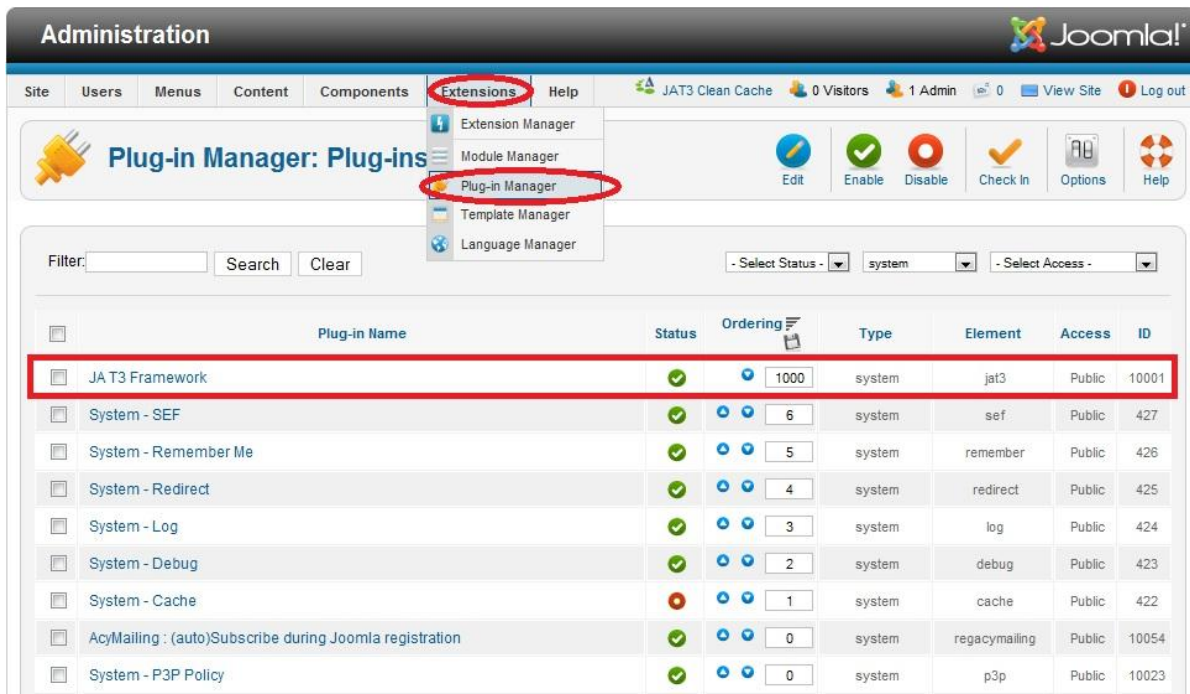

In the Joomla administration panel, please follow these steps:

Step 1: Go to Plug-in Manager

Step 2: Find JAT3 Framework's position

Step 3: Check the Status to publish this framework

Step 4: Save the change

3. BT Arise template

- Installing the template

In the Joomla administration panel, please follow these steps:

Step 1: Go to Extension Manager

Step 2: Browse the install package

Step 3: Click "Upload & Install"

The template file name is: bt_arise_template_jl25_v1.1.zip

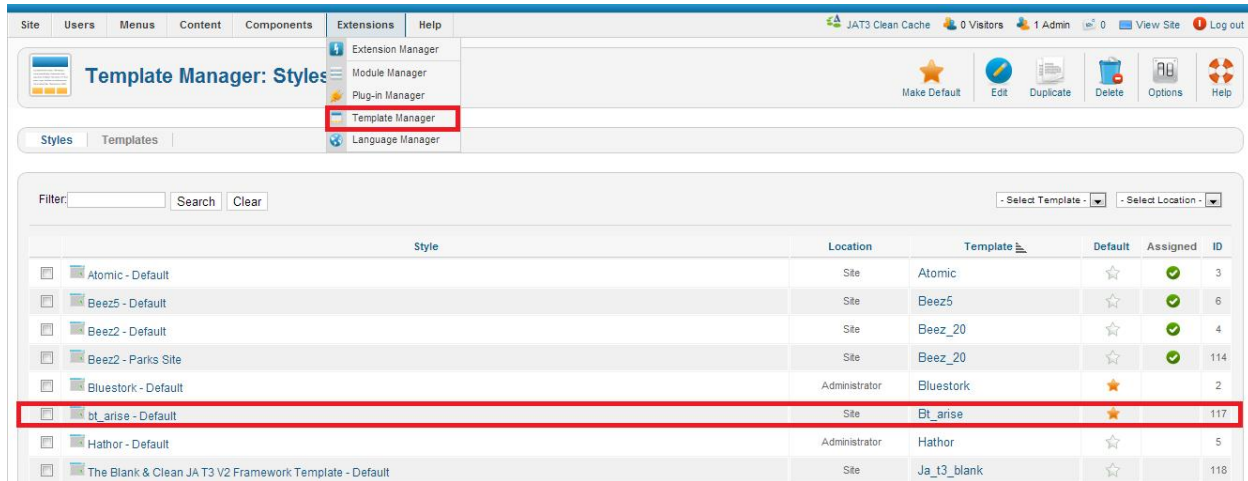

- Publishing the template

In the Joomla administration panel, please follow these steps:

Step 1: Go to Template Manager

Step 2: Find BT Arise position

Step 3: Check the star icon at “Default” column to make BT Arise the default template

- Installing needed plug-in components and module

The installation procedure is the same as installing the template

4. *BT Arise Quickstart package*

- How a Quickstart package works?

A Quickstart package is a total Joomla website installation kit that installs the template and all of the components and plug-ins onto your server at once.

Bowthemes provides quickstart package for each template which aims to easy to use and comfortable for users. It will help you save much time of installing and configuring if you plan to start your site from the beginning. Installing Quickstart package is quite easy as you install normal Joomla!

- How to install a Quickstart package

Please refer this instruction in Bowthemes Website:

<http://bowthemes.com/how-to-install-bow-themes-template-quickstart-pack.html>

Template Customization

1. Changing logo in header

There are two ways to change logo image located on top of the template:

- 1st way

Just replace the `t3_logo_light_17.png` on your template folder with the one you want on the top of your site (rename the image file in png first). The folder's path is:

`...\templates\bt_arise\images.`

- 2nd way

Open file: `...\templates\bt_arise\css\template.css`

- On line 324: Replace the name "`t3_logo_light_17.png`" by your logo's name
- On line 326 and 327: Replace logo's height and width here

2. Changing logo in footer

In administrator, go to Extensions -> Module Manager, find the position "logo-footer", then upload your image logo (Logo footer is custom html module).

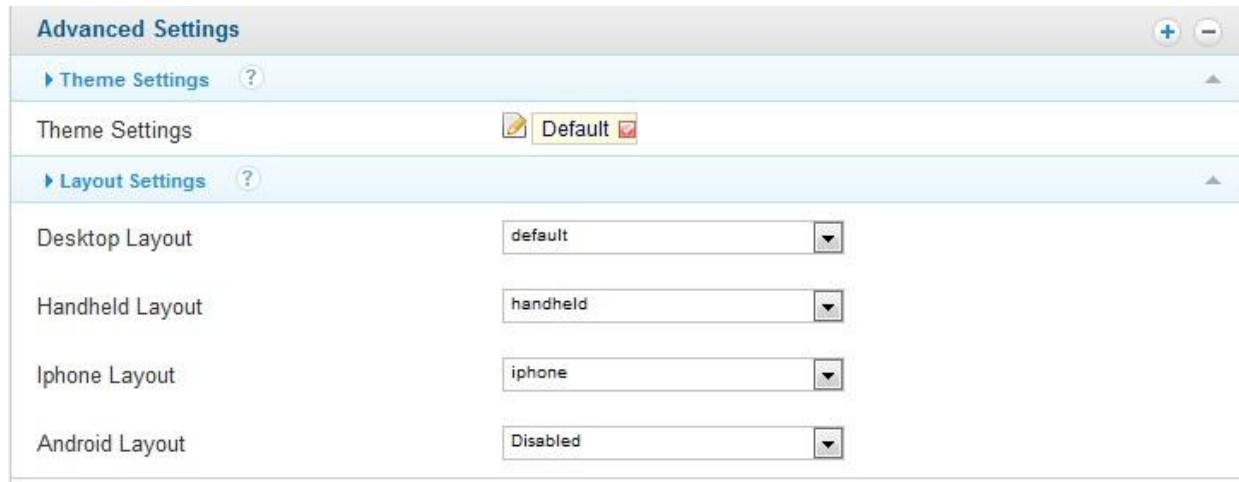

3. Changing color theme

The templates administration panel allows you to customize a lot of features regarding the template layout, color profile and other settings like file compressions. Once you've installed the template, the first decision you have to make is which profile you are going to use for your site.

You can also select any of the other profile as your primary profile:

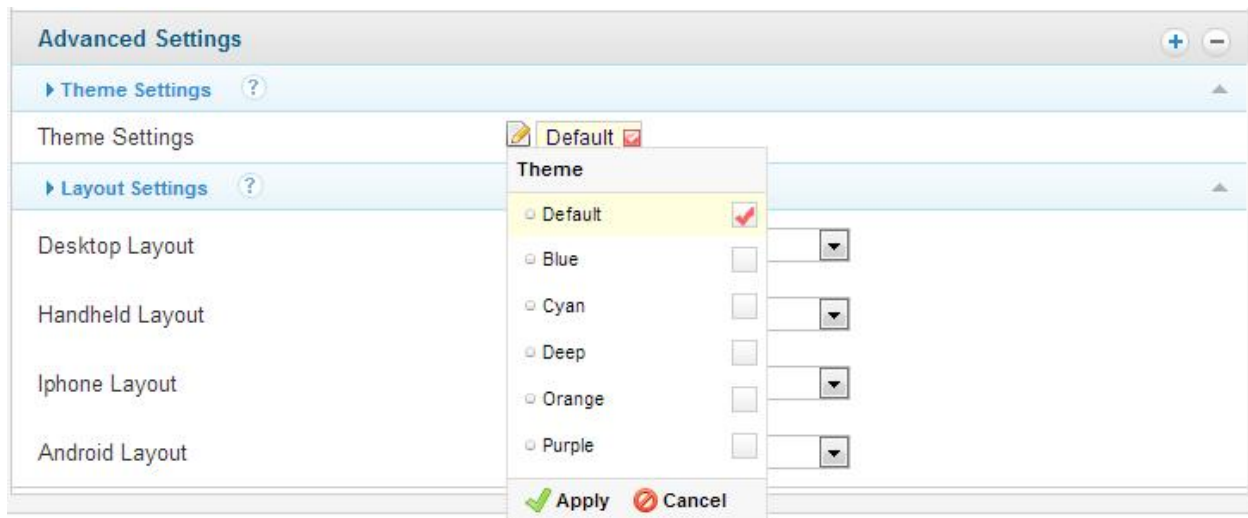

- Open the template's administration panel
- Click on the profile tab and scroll down to the advanced settings to use for your site
- Select the profile you want to use

There are six profiles included in the template. A default profile is already loaded. This profile is the backbone of the template.

In the “Theme settings” section, please click on the edit icon. A pop up will display the profiles list.

Select your desired profile by ticking the little box to the right, then click “Apply”.

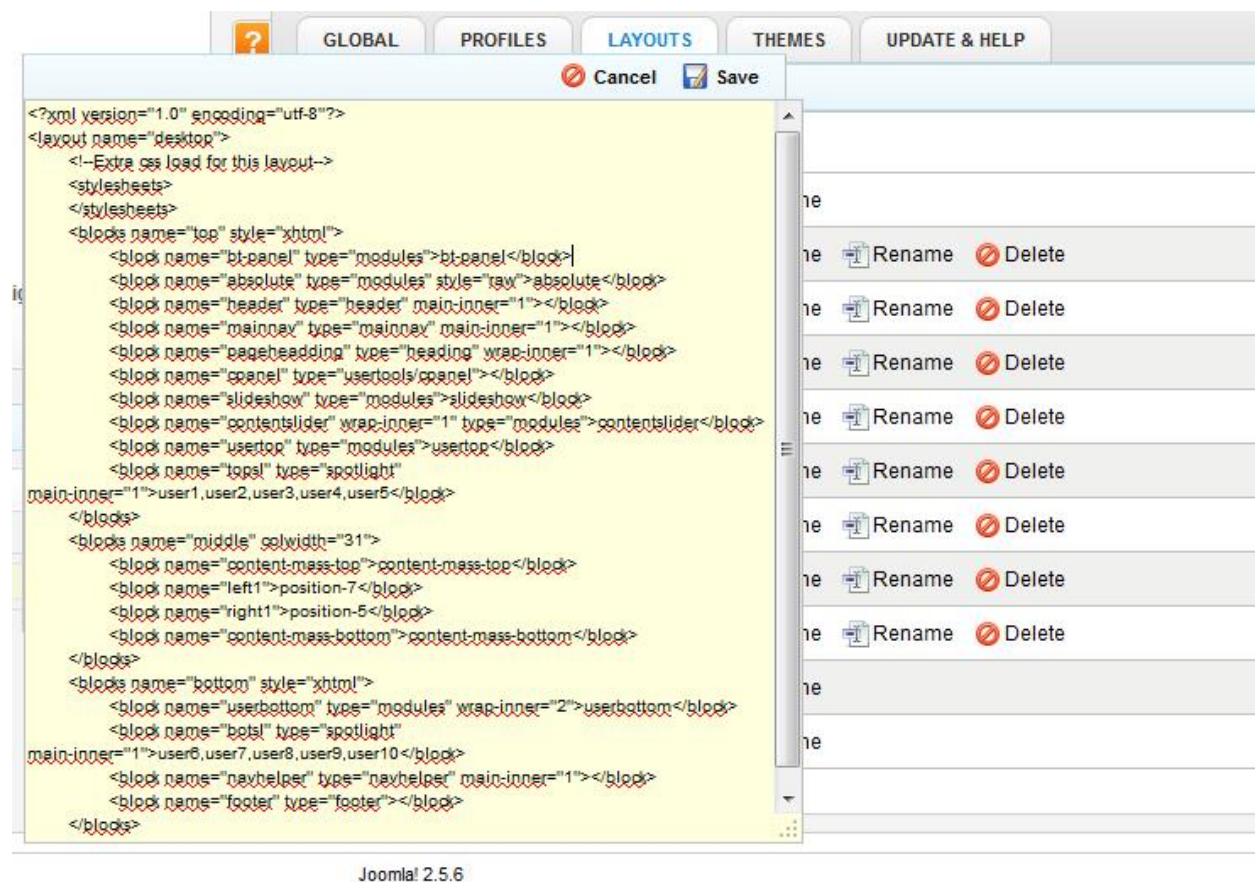

Scroll up the page and save the changes you just made.

Template Layout

The BT Arise template comes with one default layout made up of 03 columns:

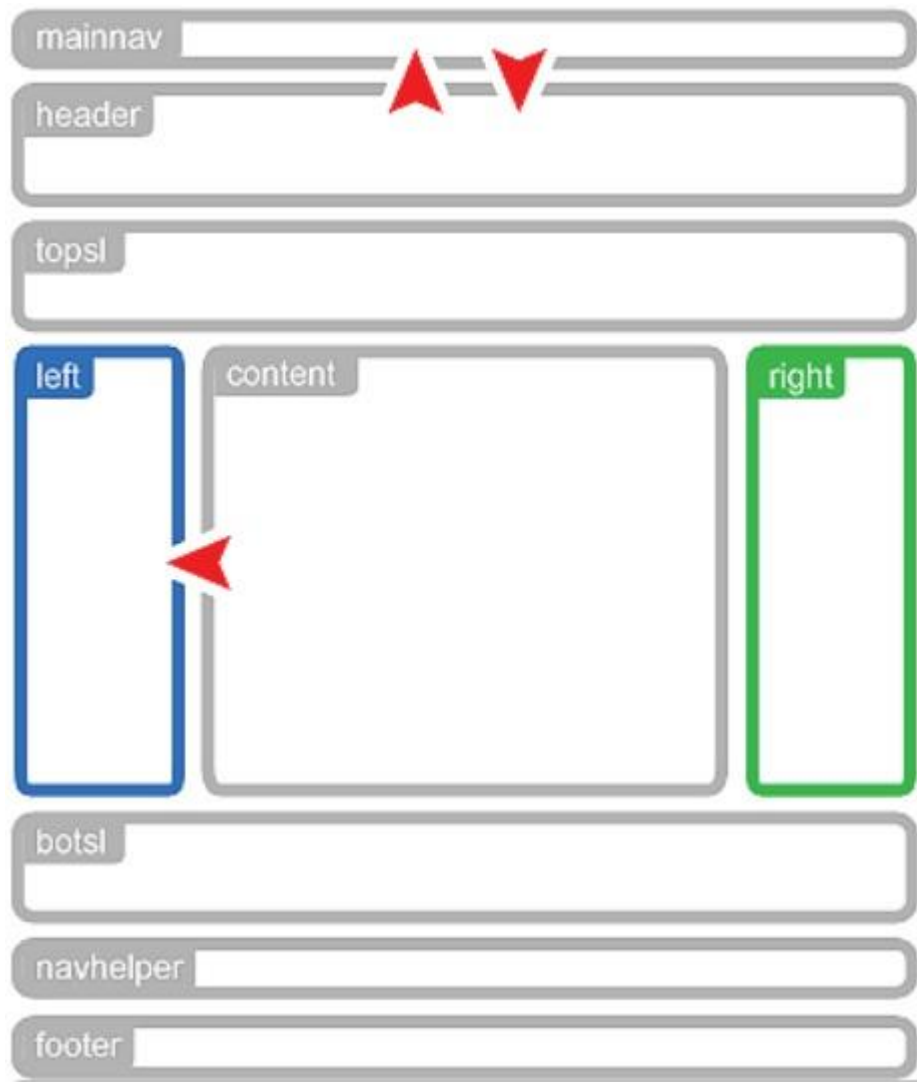

Main - Left - Right

The layout parameters are contained in XML files which can be customized from the templates administrator panel, to generate these following layouts: Left - Main, Left - Right - Main, Main - Left, Main - Left - Right, Main - Only, Main - Right, Main - Right - Left, Right - Main - Left.

Joomla! 2.5.6

You can also customize the positions by simply moving the blocks around.

For an in-depth read on layout customization, please check out article about JA T3 Framework on the Wikipedia:

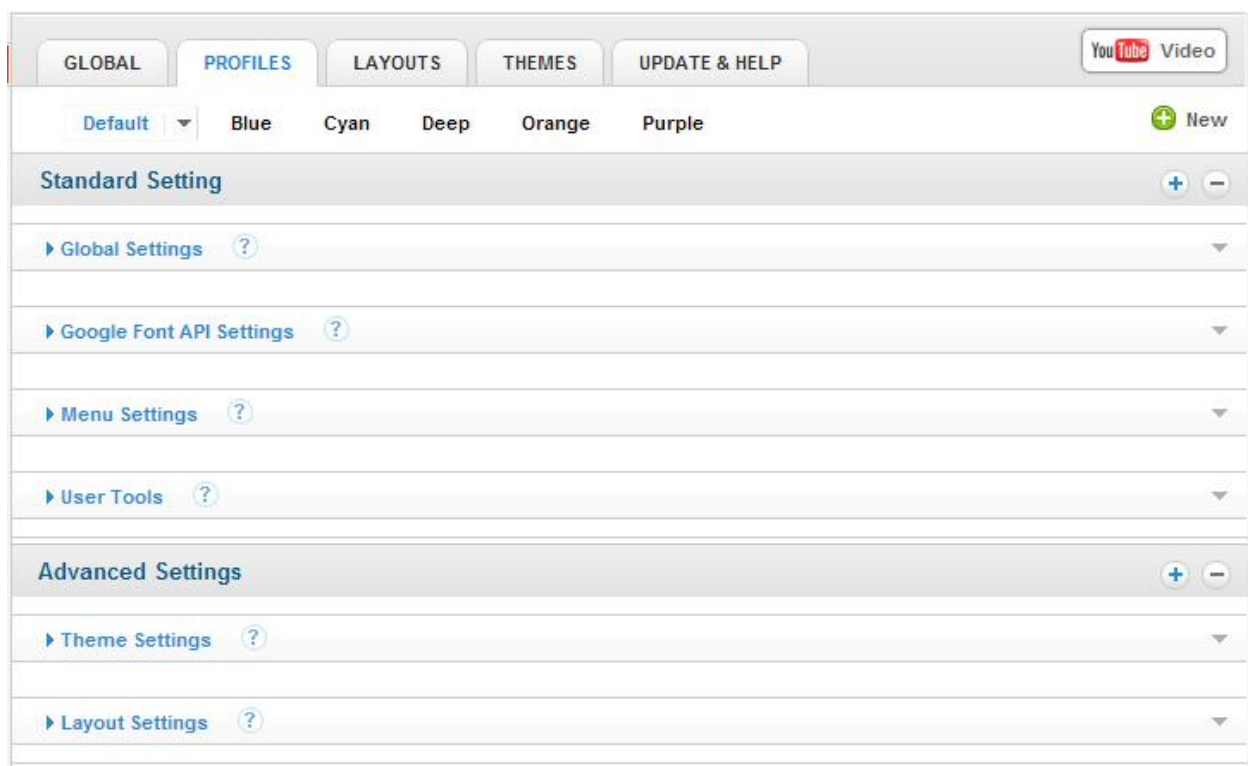

http://wiki.joomlart.com/wiki/JA_T3_Framework_2/Guides#Default_Layout

Template Profile

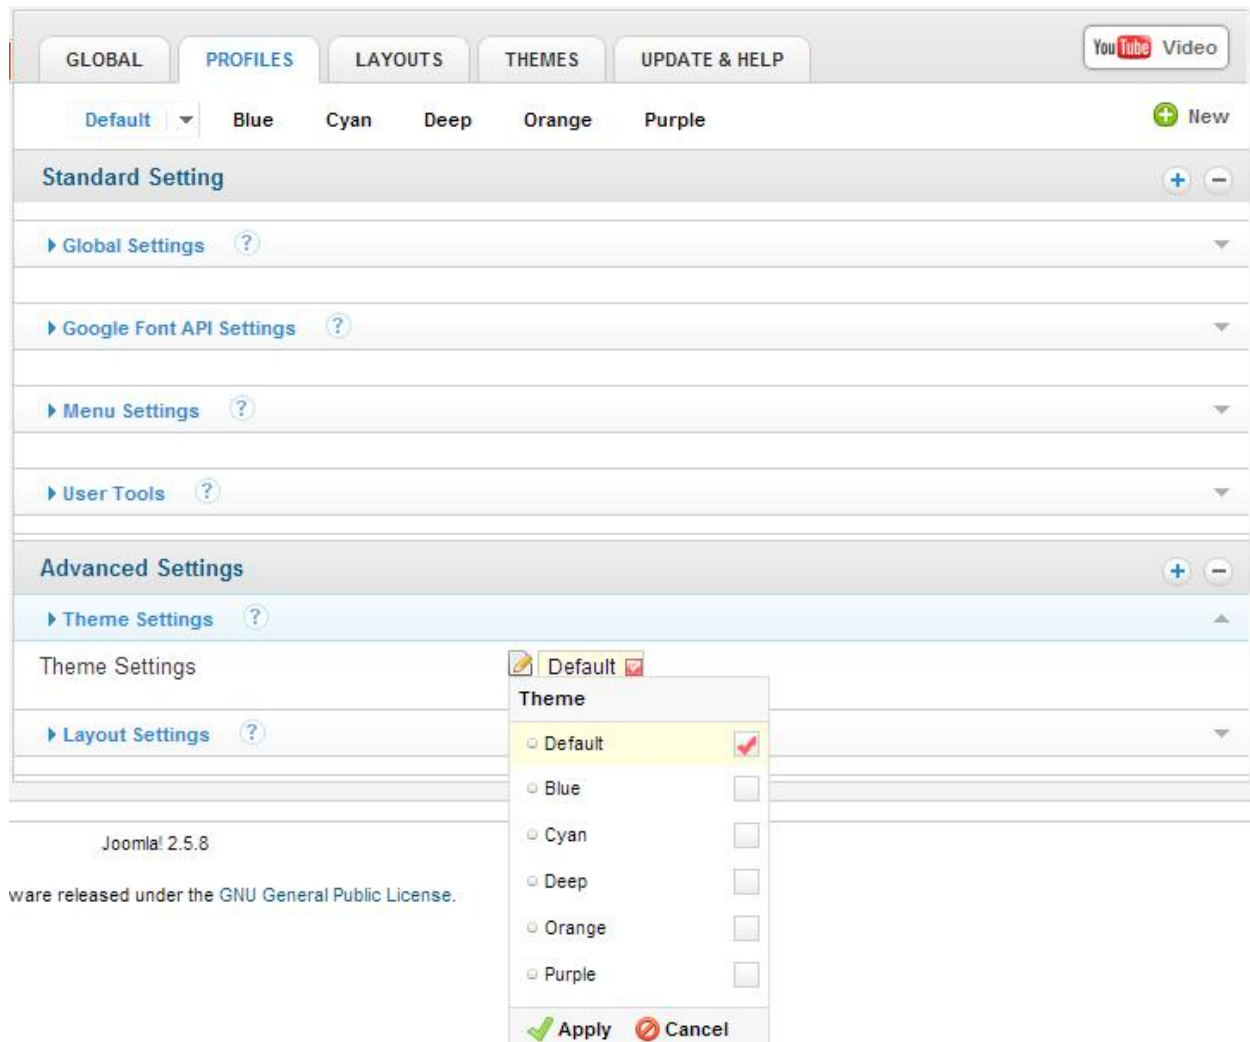

The template contains five color profiles:

- Default
- Blue
- Cyan
- Deep
- Orange
- Purple

You can manage these profiles through the profiles panel found in the template administration panel.

With this panel, you are free to create, clone, edit, delete (your own) profiles. In addition, for each profile you can customize all template settings: logo, font-size, layouts, menu system, color theme, text-direction, etc. All these settings are split into several sections as you can see in the illustrated image. You can easily select a profile as your default profile for your website as well.

BT Arise comes with 20+ built-in module positions. The number of modules contained in each module position is unlimited. For example: you can have 2 or 3 modules in the left module position.

Module Variations

There are six special module styles, namely:

- Position-7
- User1
- User2
- User3
- User8
- User9

Each style is activated by assigning a module class suffix to the module. You can see more details on the page:

<http://bowthemes.com/images/templates/bt-arise-position.png>

<http://bowthemes.com/images/templates/bt-arise-contact-position.png>

Use module suffix: `_newsletter` to use this style on a newsletter subscription form

Typography

The typography of the template is managed by the T3 typo system plug-in. This plug-in allows you to utilize advanced typography in your content

Before you begin the installation process, you need to ensure that this plug-in is installed and activated. It can be installed like normal Joomla Extension through Extension Manager. Check the Plug-in manager to activate it.

From now on, you can use it to style your content just by clicking the JA Typo button and select the style you want from the popup.
